Popular Demand Encourages Akron Roof Repair Company to Expand Again

March 18, 2022

Akron, Ohio - March 18, 2022 -
Akron, Ohio, roof repair company, TK Roofing & Gutters, has worked hard to build a solid reputation in its area. This comes from offering quality roofing and gutter services combined with well above average customer service. As word has spread about the company's commitment to its work and the integrity they display while doing that work, it has greatly increased the demand for their services. Because of this demand, the company has once again chosen to expand its Ohio service territory. Daryl Gentry, the owner of TK Roofing & Gutters, says, "As our company has grown and people hear about the quality of our services, then it's expected that you will get a few calls from home and business owners outside your service area inquiring about your availability. But when those calls start to become more frequent, like any prudent business, we have to start considering expansion. That's why we have decided to once again expand our service territory."

Gentry talked about how he never expected that their family-owned and operated local business that started up in 2007 right in Akron would now be serving as many areas of Ohio as it does. At first, this happened by expanding their roofing and gutter services into nearby greater Akron areas such as Portage Lakes, Lakemore, East Akron, Barberton, and Norton. He says that as their popularity grew, they were asked by home and business owners to take care of their needs in such communities as Wadsworth, Uniontown, Norton. Over the years, they have slowly expanded to more Akron area communities, and it amazes him that they now do roofing and gutter work as far away as Cuyahoga Falls, Kent, and Medina. A complete list of the Ohio areas that TK Roofing & Gutters serves can be here at https://www.tkroofingandgutters.com/roof-repair-areas-served.

The company owner also stated that part of their popularity comes from the many different roofing and gutter options that they offer their customers. This includes one of their specialties which is whole roof replacement, and they are willing to take everything from the smallest to largest roof repairs. He pointed out that they also respond very quickly when someone needs a storm damage repair to their roof and how they can help

anyone upgrade and maintain their gutter system. Gentry added that it also helps the demand for their services when the majority of the reviews that have been left on their services are overwhelmingly favorable. An example of that is a 5-star review written by Connie Baker, which proclaims, "Daryl and company were awesome! Very helpful through the whole process of putting on a new roof. Always available to answer any questions and help guide us through the process. Everything was done to perfection! We couldn't be happier with how our roof and gutters turned out! Would highly recommend them!"

The company has also added to its reputation by being on the receiving end of many rewards. This includes getting such recognition as the expertise.com 2022 Akron roofer of the year and the 2020 Angie's List Super Service Award. They are also fully certified to install some of the most popular brands of roofing and gutter materials. All of this goes along with them being fully licensed and insured, guaranteeing all of the work that they do. They also provide free roof inspections and estimates and will go over the entire quote with their customers, so homeowners understand what's going on with their home. Gentry stated that they also like to help their customers make important roofing decisions by posting blogs to their website that answer such questions as to why don't delay roof repairs. He says that those that would like more information on their roofing and gutter services are welcome to call or email him. They can also take time to fill out the contact form on their website. The company owner closed by saying that they will take continue to dedicate themselves to their craft, so the demand for their roofing and gutter services remains at a high level.
