

Backyard Bug Patrol Helps Maryland Residents Deal With Ticks

March 28, 2022

Great Falls, Virginia - March 28, 2022 -
Great Falls, VA-based Backyard Bug Patrol would like to reach out to homeowners in the area who may be looking for help with handling the upcoming tick season in Maryland. Using an advanced system of tick tunnels (recycled, biodegradable cardboard tubes which are stuffed with cotton balls that have been treated with Backyard Bug Patrol?s tick-killing solution), Backyard Bug Patrol helps Maryland homeowners keep their homes and their loved ones safe from ticks. Anyone can reach Backyard Bug Patrol through their Facebook page at the following link: https://www.facebook.com/BackyardBugPatrol.

Tick tunnels are designed in such a way as to make it so white-footed mice and other rodents enter the tubes and take the cotton balls back to their dens where the deer ticks that live there during one phase of their life cycle are killed. The cotton balls kill only the ticks without harming the rodents, getting rid of the threat before it has a chance to become a threat at all. The tick tunnels have proven very effective in helping homeowners control the tick problem, and with the tick season fast approaching, they are an absolute necessity.

?Nature is unpredictable,? the company says. ?For our customers on seasonal contracts, if at any time between your regularly scheduled Tick and Mosquito service you have any problems with these pests, simply give us a call, and we will treat your backyard free of charge. Backyard Bug Patrol was established in Great Falls, Virginia in 2010 not too far from the Great Falls Village. The Mitchell family originally moved to Great Falls in 2001 where their kids went to Great Falls Elementary School and Cooper Middle School in McLean. The Mitchells were very active in Great Falls soccer and basketball. We value the community, know our neighbors and strive to provide first-class pest control services to the Great Falls community. Please ask us how we can help with your pest control needs.?

Backyard Bug Patrol places great emphasis on product safety. The products they use to get rid of various pests are far safer than many of the chemicals found in the average household. This does not mean, however, that their products are ineffective. Backyard Bug Patrol?s anti-bug products are renowned for being highly effective in removing all kinds of pests, and they do so without harming pets, plants, or people.

They are also committed to giving back to the community. Backyard Bug Patrol, in addition to educating people about the dangers of ticks and mosquitoes, and other pests, has a number of community-oriented undertakings under its belt. They have donated funds to various schools and churches, contributed to campaigns to raise awareness for multiple diseases, and much more. The community sees Backyard Bug Patrol as a central fixture in the health and well-being of the Great Falls area. Thanks to Backyard Bug Patrol, not only are homes in the area free of pests, but a number of community programs have adequate funding.

?We have been using Backyard Bug Patrol's mosquito barrier treatments for many years, and we've been very pleased with the results,? says one member of the Great Falls community. ?Our backyard used to have so many mosquitoes that our kids would be bitten up every time they went outside to play. But Backyard Bug Patrol has drastically reduced the number of mosquitoes and gnats in our backyard, so my kids now enjoy being outside again! We added the Backyard Bug Patrol rodent bait services, and it has gotten rid of our problems with mice in our house.?

Another happy homeowner says, ?This place is the best! When we first moved into our house, we got descended on by mosquitoes every time we were in the yard. Backyard Bug Patrol made our yard usable again. We use the Simply Organic Program to avoid toxic chemicals. Our neighbors now use them too, so we have a nice mosquito-free few yards. They are also so good and professional in all of their communications. They let you know ahead of time if they can't come due to weather.?
