

Be-Safe's Expert-Led Guide Examines Essential Security Measures To Secure The Home For Children

March 30, 2022

March 30, 2022 - PRESSADVANTAGE -

March 2022: Be-Safe releases a new article that examines essential security measures to secure the home for children. The guide, published on Be-Safe's website, was compiled using expert opinions on the topic. The guide was released amid the rising number of child accidents in the home. Readers can find the full guide [here](#).

In 2019, there were more than 7,000 deaths of children and teens as a result of unintentional injuries. On average, 20 kids and teens died every single day. Unintentional injuries to children are most often caused by motor vehicle accidents, suffocation, drowning, poisoning, fires, and falls. Injuries to children can often be prevented with some safety measures in place. The publication analyzes how such injuries and accidents can be prevented. The experts in the guide explained a list of security measures that need to be implemented around the house to ensure the safety of the children.

For the guide, home safety experts were consulted for their professional views on home safety for children. Parents and guardians were also quoted in the article. Be-Safe's team of safety experts oversaw the final compilation and review of the guide. The experts interviewed for this article discussed the various risks and

hazards commonly found around the house and how to secure them. The guide found 18 essential safety measures adults can take to make the home safer for their children.

Since its inception, safety advisor Be-Safe has provided information, advice, research, reviews, comparisons, and analyses on topics that directly impact community safety, security, and quality of life. The guide was published as part of their regular research on child safety for their readers. For more information on home security, readers can visit their page; <https://www.be-safe.org/home-security/>.

"This guide helps simplify the task of tackling all the potential risks in the house. Our guide is backed by expert analysis to provide readers with practical tips to help them secure their house more effectively for their child," said Dennis Chapman, Senior Security Consultant for Be Safe. He believes efficient security can only be achieved through understanding all the elements of safety and the security systems commonly used.

In its efforts to help people learn more about how to protect themselves, their loved ones, and their possessions, Be-Safe offers guides and advice for individuals, communities, and the public on essential safety information. It also discusses home safety measures, security products and services, offering reviews of how these products and services work and why they are essential in ensuring one's safety and security.

Chapman said, "With our content, we provide in-depth, authentic information about safety and security so that we can help people make better decisions about securing everything they care about." Readers can learn more about the best and cheapest home security systems, by visiting their page: <https://www.be-safe.org/what-is-the-best-and-cheapest-home-security-system/>.
