

North Texas Plumbing Offers Medical Gas Piping Installation Services in the Dallas Fort Worth Area

April 11, 2022

WATAUGA, TX - April 11, 2022 -

North Texas Plumbing, a commercial plumbing company based in Watauga, TX, is pleased to announce that they are offering medical gas installation services for different types of health care facilities in the Dallas Fort Worth Area. This means they will repair or install medical gas pipes for hospitals, medical offices, dental facilities, surgery centers, veterinary clinics and surgical offices, emergency rooms, operating rooms, hybrid operating rooms, and more. They are fully licensed and insured to offer medical gas pipe installation or repair services. The medical gas pipe system that they will be installing will have a number of features, such as: nitrous oxide piping; oxygen piping; oxygen pipe welding; medical gas manifold installation; takeoffs and engineering; medical air compressor installation; medical gas outlet, zone valve, and alarm installation; and medical vacuum installation.

They ensure that all of the medical gas piping that they will be repairing or installing will follow the NFPA 99 standards for positive pressure medical gas plumbing. The medical pipes are to be utilized for delivering different types of medical grade gases from a utility room where the gases are stored in tanks and then delivered through pipes to various locations in the medical or health care facility. The fire safety standard indicates the appropriate levels of health care systems depending on the risk to staff, patients, and visitors, in

order to minimize the chances of fires, explosions, fires, and electrical accidents.

Marc Sims, owner of North Texas Plumbing, says, ?North Texas Plumbing is a commercial plumber service that specializes in medical gas installation plumbing services for both new construction and renovation of hospitals, veterinary clinics and surgical offices, surgery centers, dental facilities, emergency rooms and all other medical gas piping applications. We are fully licensed and insured for medical gas work. We can custom engineer the right medical gas system for your facility and complete the job from design to completion. We provide a 24/7, 365 days a year commercial plumbing service. We are dedicated to providing our customers with exceptional, punctual and professional service backed by our 100 percent satisfaction guarantee.?

The medical gas plumber who will be installing the piped vacuum systems, the medical gas plumbing system, and the supporting components for manifolds, outlets, zone valves, and alarms, is always ensured by the company to be a certified ASSE 6010 installer. The commercial gas plumbers is their team are ensured to be fully knowledgeable and well-experienced in the various oxygen storage methods, including chemical compounds, high-pressure oxygen tanks, and cryogenics. The medical gas plumbing systems in Texas are also mandated by the State to have a certification from the State Board of Plumbing Examiners.

The North Texas Plumbing team will make sure that zone valves and emergency shut-off valves are installed in the system for safety purposes. These valves have the purpose of stopping the flow of the medical gas in a certain part of the medical gas piping system in case there is an accident or a large leak or there is a fire, and also when they are servicing the system. Valves may also be installed at the entrance to departments and emergency pull-out windows are provided to allow access to these valves.

Having started their business operation in 2013, North Texas Plumbing offers commercial plumbing services for businesses in the Forth Worth - Dallas - DFW Metroplex - North Texas are. They specialize in: water line rerouting; drain line repiping; grease trap installation; medical gas plumbing; water main repair and replacement; water jet pipe cleaning; sewer line repair and replacement; tankless water heater installation; foundation leaks and slab leak repair; gas line repair; drain cleaning; gas line installation; and more.
