

SEO Gaining In Popularity With Auckland NZ Businesses

November 10, 2015

November 10, 2015 - PRESSADVANTAGE -

Auckland SEO Limited, based in Auckland, CBD, has revealed that SEO is starting to gain in popularity with businesses in Auckland, NZ. It is believed that this is because they are finally becoming more aware about the search habits of their customers. Yet, there are still many businesses that do not have a strong enough focus on SEO, which means those who do have a strong chance of getting ahead of their competitors.

"There is a huge opportunity right now in the NZ market for businesses to get ahead of their competition online," says David Rees from Auckland SEO Limited. "Traditional marketing remains the most popular form in this area and, while it certainly has good results on the local market, it is wholly inefficient for businesses who want to brand out further afield."

When it comes to SEO Auckland businesses are still lagging behind, but they have a chance to make a strike now. Auckland SEO Limited is there to help them achieve this by offering comprehensive services. Their packages are designed to help businesses increase their sales, gain more clients and customers and increase their turnover. They take a simple three step approach to achieve this: a free website audit, an SEO campaign, and continuous marketing once the previous efforts are starting to pay off.

"We also offer a range of other, more specialized services," adds David Rees. "These include web design and development, and internet and social media marketing. The latter is particularly important in today's day and age, where people find out everything through social media."

The company currently offers a free website audit to all interested parties. This audit will show them where their website currently stands and how strong their online presence is. In so doing, they will also be able to identify methods of improvement. The company will show them exactly how much difference a properly managed SEO campaign could mean to their business as a whole.

Those who have already used the company's services have been full of praise. They have all seen a noticeable increase on their turn over and customer database, precisely as promised.
