

Vasectomy Reversal Cost Greatly Reduced With Dr. Mark Hickman

April 20, 2022

New Braunfels, TX - April 20, 2022 -
New Braunfels, TX based Microsurgical Vasectomy Reversals by Dr. Mark Hickman is available to all those who wish to reverse a vasectomy without breaking the bank. While many men may undergo a vasectomy as a precaution, it is understandable that the circumstances of their lives can change to the point they feel they are ready for children later on. It is commonly believed that vasectomies are permanent as well, but this is fortunately far from the truth. All an individual or couple needs to do is contact Dr. Mark Hickman to learn how they can start having children again.

Surgeons across the country offer vasectomy reversals as part of their practice, and a patient will not find it difficult to locate a nearby healthcare provider that offers this service. However, Dr. Hickman specializes in this procedure ? and it is the sole focus of his practice. As a skilled pioneer in microsurgical technique, he has successfully performed thousands of reversals.

Furthermore, his practice simplifies the matter even further by offering no more than two all-inclusive yet

affordable options. The microsurgical vasectomy reversal (at $3,300) is carried out under local anesthesia and an oral sedative. On the other hand, patients may prefer the $4,200 offer, which is performed under IV sedation (administered by a Board Certified Anesthesiologist). Both offers are all-inclusive, so patients will never have to deal with additional or hidden fees.

Anyone looking for an affordable vasectomy reversal, therefore, need only consult with Dr. Hickman?s team to find out everything they need. The surgeon has helped many patients undo their vasectomies when they are ready, with countless procedures making way for successful pregnancies to take place soon after. As an account from Sheilah B. shares, reversals are even possible well after the point that patients may consider themselves viable candidates for this procedure. ?Doctor Hickman performed my husband's vasectomy reversal in March of 2020, ten years after his vasectomy,? the account (posted as a review on the clinic?s Google profile) says, ?and we conceived a few months later. My daughter arrived a little early, but our original due date was exactly one year after surgery. Dr. Hickman and his staff were all very knowledgeable and friendly, and the procedure itself was very affordable. We're obviously thrilled with the outcome!?

In fact, Dr. Hickman?s expertise is so well established in his community that patients go out of their way to see him. Furthermore, he responds to such efforts by committing himself even further, and patients often find that he is willing to provide additional assistance where he is able. As another review by Jamie D. says, ?My husband and I made a road trip from MN to see Dr. Hickman for a vasectomy reversal back in 2012. We ran into car trouble on the way there and had to call to figure out how we?d make the surgery. He had plans the next day, but rearranged his schedule and still made time to see us!! We even needed to bring my 2-year-old old son, and one of his nurses entertained him so I could be with my husband during the surgery. The reversal went pretty smoothly, and I?m happy to say that, 4 1/2 years later, my husband and I were able to naturally conceive children. I?m grateful for this team and highly recommend them!?

Dr. Hickman?s team is always ready to work with patients coming from distant locations, both from other parts of Texas and beyond. The practice offers exclusive arrangements for out-of-town patient accommodations, so they invite interested parties to inform their staff at once if this is required.

Men looking for top vasectomy reversal surgerons in Texas need go no further than Dr. Mark Hickman. Even though many consider him to be a world-class surgeon in the field, Dr. Hickman considers it his duty to provide this service to as many people as possible, and he understands that accessibility is often defined by how affordable a procedure is. As a result, his patients enjoy some of the best rates possible as well as the highest quality care ? and the highest chances of a successful reversal. With Dr. Hickman, it is all but guaranteed.
