

Pasadena Surgeons Now Offers Brazilian Butt Lift Surgery to Los Angeles Area Clientele

November 09, 2015

November 09, 2015 - PRESSADVANTAGE -

Pasadena Surgeons, based in Pasadena, CA, are proud to announce that they are now offering the Brazilian butt lift procedure. This popular procedure is designed to use a patient's own tissue to lift and sculpt the buttocks area, creating a rounder, more feminine figure and slimmer waistline. Further information about the procedure, including before and after pictures, is available on PasadenaSurgeons.com.

"The Brazilian butt lift is now one of the most popular cosmetic procedures on the market," says Dr. Shankar Lakshman from Pasadena Surgeons. "Needless to say, we felt that we had to add it to our list of offerings. After completing the necessary training, we are proud to announce that the procedure is now available in our clinic."

To celebrate the availability of this new procedure, Pasadena Surgeons is offering a special for those who book during the month of November. Patients are asked to mention 'press release' when they contact the clinic in order for it to be applied.

The Brazilian butt lift procedure is so named because it is said to create the derriere that many Brazilian women have naturally. It is a reasonably non-invasive procedure with very few complications. The reason for this is because the doctor liposuctions the entire front of the abdomen, the upper and lower back and the waist. The doctor then purfies the patient?s fat and transfers it to their buttocks. This gives the patient a dual benefit of a trimmer waistline and sculpted, sexy backside. This also avoids the chance of the tissue being rejected by the body, leading to infections or other problems.

"As a plastic surgeon, I was so happy when the Brazilian butt lift was approved," says Dr. Shankar Lakshman. "Too often, I saw people have implants to lift their butts, and the results were frequently terrible. Horror stories of the implants sinking or people having allergic reactions to them filled me with dread. Having completed the training in full now, I am happy that nobody in the Los Angeles or Pasadena area will ever have to risk this again."

Those wanting a new look in 2016 for their waistline and backside are encouraged to contact the Pasadena Surgeons for further information. By asking for Pasadena Surgeons - Brazilian Butt Lift Surgery, they will be provided with all the necessary details about the procedure and how to prepare for it. As one of the top rated, best reviewed plastic surgery clinics in the area, people are sure to be impressed with the service and results.
