

EPS Landscaping & Tree Service LLC Offers Pembroke Pines Tree Care

May 02, 2022

Pembroke Pines, Florida - May 02, 2022 - PRESSADVANTAGE -

EPS Landscaping & Tree Service LLC, a company based in Pembroke Pines, FL, is happy to announce that they are ready to provide tree services in Pembroke Pines and in Broward County. Their tree services in south Florida include tree planting, tree trimming, tree removal, tree relocation, palm tree trimming, stump grinding and removal, and emergency tree removal. EPS can send tree experts to the client's location to evaluate the trees and then suggest a complete range of arborist services and tree maintenance services.

Greg O'Connell, co-founder of EPS Landscaping & Tree Service, says, "As tree cutting experts, we can find signs of disease or dead limbs and get rid of them. We have tools for any tree work, offer the area's most competitive prices, and we take pride in improving your yard's appearance and your satisfaction. Check out the many reviews we've received from happy customers for tree services Pembroke Pines FL."

The offices of EPS Landscaping & Tree Service LLC are found in the Pembroke Falls community and they serve the whole area of South Florida. When in need of tree trimming and other kinds of tree services in

the area, homeowners and other property owners can depend on the arborists at EPS to make their trees look better and provide the tree removal or care needed if there are dead or dying trees or trees that are diseased.

Tree trimming can be useful in ensuring that the trees look better and emphasize their natural shape. Trimming may also be needed if the tree branches and leaves have become too long or too thick such that they are preventing the rain from getting to plants in the garden under them. Tree pruning may be needed if there are dead or diseased branches. Such branches will need to be removed to prevent the disease from spreading to the other branches or other trees.

Tree trimming and tree pruning may actually be part of a tree maintenance service that can be scheduled regularly. The amount of tree branches that will have to be removed with each trimming or pruning, will actually vary and depend on how tall or wide a tree can be allowed to grow. Thus, there is no hard and fast rule on how much of the tree will need to be trimmed. However, there are certain percentages that can serve as guides. For example, for young trees, trimming should not be over 25 percent of its growth. If a specific tree has a fertile soil and other valuable resources, it can be expected to be capable of withstanding canopy pruning. For middle-aged trees, about 20 percent of the canopy can be trimmed. And for mature trees, trimming should not be more than 10 to 15 percent of the foliage because these trees will need as much green surface as possible to optimize their photosynthesis and remain healthy.

Meanwhile, they also offer palm tree trimming, which is essential because dead fronds can be a fire hazard. In addition, they have a negative impact on the aesthetic aspects of the garden. However, it is important to note that the best season for pruning palm trees is spring when the weather is calm. And when trimming a palm tree, the arborists will have to be careful in not cutting more than what is needed.

EPS Landscaping & Tree Service is a company in Pembroke Pines, Florida that is committed to providing landscaping and tree services in the Broward County area at affordable prices while ensuring that they always provide high quality tree services. They offer their services to a number of areas in Broward County, such as Coral Springs, Hallandale Beach, Southwest Ranches, Dania Beach, Hollywood, Deerfield Beach, Pembroke Pines, Fort Lauderdale, and Pompano Beach.
