May 2022: The Morning News releases a new article that explores the relationship between gut health and overall wellbeing. The report, published on The Morning News? website, was compiled using expert opinions on the topic. The report was released to address the health issues of bad eating habits.

As a result of weak gut health, the autoimmune system can malfunction, leading the body to attack itself. The presence of poor quality bacteria in the stomach may also contribute to the development of certain food intolerances. Poor gut health may also contribute to weight changes, eczema, and other skin conditions, as well as insomnia and fatigue. The publication analyzes how gut health affects overall wellbeing. The experts in the report explained the different ways the body?s overall health is impacted by what it consumes.

For the report, medical experts were consulted for their professional views on how digestive issues and poor gut health can affect general well-being. Nutritionists and wellness experts were also quoted in the article. The final compilation and review of the report were overseen by The Morning News? team of experts.
