

North Texas Plumbing Has a Team of Medical Gas Plumbers for Health Facility Gas Piping Installation in the Dallas Fort Worth Area

May 09, 2022

WATAUGA, TX - May 09, 2022 -

North Texas Plumbing, a commercial plumbing company based in Watauga, TX, is happy to announce that they are ready to offer the services of a medical gas plumber to help with the medical gas pipe installation in healthcare facilities in the Dallas Fort Worth Area, including Dallas, Fort Worth, the DFW Metroplex, and North Texas. These specialist plumbers have the experience and knowledge with regards to the installation of the medical gas pipes for hospitals, medical offices, emergency rooms, health care facilities, operating rooms, veterinary offices, and veterinary surgical centers.

These specialist commercial plumbers are fully licensed and insured to provide medical gas pipe installation or repair services. The medical gas pipe system that they will be installing will have several key features, including: oxygen piping; oxygen pipe welding; nitrous oxide piping; takeoffs and engineering; medical air compressor installation; medical gas manifold installation; zone valve, alarm installation; medical gas outlet, and medical vacuum installation.

Marc Sims, owner of North Texas Plumbing, says, ?From hospitals to dentist offices, surgical centers and assisted living facilities we provide expert medical gas piping installation solutions in the Dallas Fort Worth Metroplex and all over Texas. Our no hassle, flat rate pricing means everyone pays the same reasonable price no matter what part of town or which neighborhood you live in. This also allows us to do a quality job without someone holding a stopwatch to us. We can assure you the first time you use DFW plumbing you will become part of the family and a valued custom for life.?

They will make sure that all of the medical gas installation that they will be providing will be in compliance with the NFPA 99 standards specified for positive pressure medical gas plumbing. The purpose of these medical pipes is for delivering various kinds of medical grade gases from a utility room where the gases are stored in tanks and then delivered through gas pipes to different locations in the medical or health care facility. The fire safety standard specifies the proper levels of health care systems based on the danger to patients, visitors, and staff, in order to minimize the chances of explosions, electrical accidents, and fires.

The specialist commercial plumber from North Texas Plumbing who will be installing the medical gas plumbing system, the supporting components for manifolds, outlets, zone valves, and alarms, and the piped vacuum systems, is a certified ASSE 6010 installer. The commercial gas plumbers is their team are ensured to be fully knowledgeable and well-experienced in the various oxygen storage methods, such as high-pressure oxygen tanks, cryogenics, and chemical compounds. It is important to note that the medical gas plumbing systems in Texas have to be certified by the State Board of Plumbing Examiners.

The North Texas Plumbing team will ensure that emergency shut-off valves and zone valves are installed in the system for safety purposes. These valves are designed to stop the flow of the medical gas in a particular part of the medical gas piping system in case there is a leak or an accident or there is a fire, and also when they are servicing the system. Valves may also be installed at the entrance to departments where emergency pull-out windows are provided so that these valves can be accessed.

Having launched their business operation in 2013, North Texas Plumbing provides commercial plumbing services for businesses in the Forth Worth - Dallas - DFW Metroplex - North Texas area. They are focused on providing: drain line repiping; grease trap installation; water line rerouting; water main repair and replacement; water jet pipe cleaning; medical gas plumbing; tankless water heater installation; foundation leaks and slab leak repair; sewer line repair and replacement; drain cleaning; gas line installation; gas line repair; and more.

Those who need medical gas plumbers in Dallas Fort Worth Texas can check out the North Texas Plumbing

website, or contact them on the telephone or through email. They can be contacted 24 hours a day, from Monday to Sunday.
