

Cost Of Vasectomy Reversal Much Lower With Dr. Mark Hickman

May 10, 2022

New Braunfels, TX - May 10, 2022 -
Microsurgical Vasectomy Reversals by Dr. Mark Hickman, based in New Braunfels, TX, is pleased to share that they are ready to assist new patients through their highly affordable options. The practice offers vasectomy reversal surgery at an attractive all-inclusive cost of $3,300 and $4,200, depending on what the patient prefers.

The pricing tiers are designed to be simple and easy to choose between, since Dr. Hickman understands that committing to any kind of surgical procedure can be difficult enough. He also understands that many men who have undergone a vasectomy may now feel compelled to have it reversed as this decision was made too early in their lives ? and they are ready to have children, for the first time or otherwise. The doctor emphasizes that he seeks to help these men achieve their dreams of fatherhood, and it does not matter why they had a vasectomy to begin with. His sole focus is to ensure the reversal goes well and they can have children once more.

To make matters clear, he says the $3,300 option includes local anesthesia and an oral sedative. The $4,200 option is performed under IV sedation and is administered by a Board Certified Anesthesiologist. However, patients will be pleased to discover that both microsurgical options are all-inclusive ? with no hidden fees.

The families Dr. Hickman and his vasectomy reversal ministry have helped are almost universally happy with the outcome of their vasectomy reversal, as can be seen in the 5-Star reviews he regularly receives. As one such review shared by Sarah H. on the practice?s Google profile says, ?Dr. Hickman and his staff are phenomenal! We couldn?t have asked for a better experience from start to delivery . We were initially given a quote of $10,000 for my husband?s reversal. So you could imagine our skepticism when we were given such a reasonably affordable price. I don?t know about you, but we certainly didn?t have 10k on hand for an out of pocket procedure. As too good to be true as it all sounded, [but] it was true! We came in at the earlier part of 2020 and welcomed our baby girl into the world by the end of 2020. Talk about a quick turn around. So blessed, so grateful.?

Other reviews testify that Dr. Hickman is deeply invested in his work, and he takes great pride in helping families either get started or start expanding once again. A review by Sierra B. goes into great detail on this aspect of his services, and an excerpt from it reads, ?Dr. Hickman was also amazing to us. He prayed over our surgery before we began, and talked us through each step right before performing it. My husband and I opted out of having him be put under, and he was informed of what was coming next during the surgery. This was super helpful and calmed his nerves in a very high stress situation.?

The review continues, ?Dr. Hickman had great bedside manner and chatted and joked with us for the duration of our appointment. When everything was done, he told us he was highly confident in this surgery and had no doubt that we could get pregnant, so long as my husband followed the aftercare instructions. He sent us on our way with clear directions to the pharmacy he is partnered with, as well as recommendations for restaurants to try out. My husband and I decided to wait until fall of 2021 to try for a pregnancy, and we ended up getting pregnant at the end of August 2021, just days before we were supposed to go get a sperm count done. We are just about done with the first trimester and are due in June 2022.?

Anyone looking to reverse a vasectomy, no matter how long ago it was performed, may approach Dr. Mark Hickman to have a consultation regarding their options. As an expert in laparoscopic procedures who has also invented several surgical instruments and been recognized as a contributor to several other important minimally invasive patents (among other notable achievements), Dr. Hickman is uniquely placed to help them start having children again.
