

## Multiple Dumpster Size Options Now Available Through Reed Maintenance Services Inc.

*May 17, 2022*

May 17, 2022 - PRESSADVANTAGE -

Reed Maintenance Services Inc., a company based in Union Grove, AL, is happy to announce that they are offering multiple dumpster size options for residents of Union Grove and neighboring areas, such as Albertville, Huntsville, Arab, Guntersville, and Madison. By offering a range of roll off dumpster rental sizes, they are able to help clients store the junk and waste from their project or any kind of waste producing activity, such as a construction project, a home renovation project, roofing project, house clean outs, and more, and then have them easily transported to the landfill or recycling plant. It is easy to load the waste materials onto roll off dumpsters because of their low walls and they're strong enough to hold their content, and they can be parked safely in practically any location. Available sizes for the dumpsters are the: 20 cubic yard dumpster, 30 cubic yard dumpster, and 40 cubic yard dumpster.

Shane Withey from Reed Maintenance Services says, "We are now offering roll off dumpster rental. This is a great option for construction or renovation projects, or when you have a lot of waste to get rid of. Our dumpsters can hold up to 40 cubic yards of material, so they're perfect for large jobs. For more information and to order your dumpster, please visit our website or give us a call. We serve Albertville, Guntersville, Huntsville, Arab, Madison and Union Grove."

The 20 yard dumpster measures 20 feet in length, 7 feet in width, and 4 feet in height. Its volume capacity is 20 cubic yards and it can contain up to six pickup truck loads or about 2 to 3 tons of junk and waste in terms of weight. In terms of 33-gallon trash bags, it can hold between 110 to 130 bags. It may be used to haul away various kinds of junk and debris from roofing shingles discarded from a roofing project, and waste from light demolition and home clean outs.

The 30 yard dumpster measures 20 feet in length, 7 feet in width, and 6 feet in height, and has a volume capacity 30 cubic yards and can contain up to nine pickup truck loads. In terms of 33-gallon trash bags, this dumpster size can hold between 170 to 190 bags. In terms of weight, it can hold 2 to 4 tons. It may typically be able to hold junk and trash from home addition projects, multi-room clean outs, demolition projects, and community clean outs.

The 40 yard dumpster measures 20 feet in length, 7 feet in width, and 8 feet in height, and has a volume capacity 40 cubic yards. It can contain up to 12 pickup truck loads and in terms of 33-gallon trash bags, it can contain between 230 to 250 bags. In terms of weight, it can hold 4 to 5 tons of trash. It can be used to contain junk and trash from various kinds of projects, such as full home remodels, commercial demolition projects, major decluttering jobs, and office building clean outs.

It is important to point out that dumpster sizes have a weight limit, which is 2 tons for the 20 yard dumpster, 5 tons for the 30 yard dumpster, and 6 tons for the 40 yard dumpster. There will be additional charges for additional weight. Rental time is typically for 14 days and additional days will also incur additional charges.

Founded in 2002, Reed Maintenance Services has developed a great reputation in engineering and construction services, which includes maintenance services like waste management, including dumpster rentals. Various sizes of roll off dumpsters are offered and these are great options for renovation and construction projects or when there is a huge amount of waste to be eliminated.

Those who are interested in learning more about the dumpster rental services offered by Reed Maintenance Services Inc. can check out their website, or contact them on the phone or through email.
