

Contractor's Blog States Asphalt Shingles Are Still Among the Best Residential Roof Types in Denver

May 25, 2022

May 25, 2022 - PRESSADVANTAGE -

Roper Roofing & Solar is a Golden, Colorado company that's known for offering a variety of different solutions to meet its residential and commercial customers' roofing needs. It's a list that includes EPDM roofing, metal roofing, PVC roofing, tiled roofs, slate roofs, torch-down roofing, and TPO roofing choices. But the company still places a huge emphasis on the installation of long-trusted asphalt shingles. Evidence of this comes in the form of a blog post that Roper Roofing & Solar posted on its website. That blog is titled "Asphalt Shingle Roofs Remain an Excellent 2021 Roofing Choice."

This informative blog post starts by stating that asphalt roofing shingles have long been one of the most aesthetically pleasing ways to protect and waterproof the top of one's home from the many weather conditions that are found in and around the Denver area. It's a roofing material that has stood the test of time and changed and improved throughout the years. The price of this material has also remained steady or even lessened due to an abundant supply and changes in the way it's manufactured. This roofing company's blog also stated that asphalt shingles are no longer a one-size-fits-all roofing choice. That's because they are now available in many different styles and grades. This includes asphalt shingle products such as designer shingles that can mimic more expensive wood, slate, or tile roofing choices and high-grade shingles that

come with a 50-year warranty. The blog even mentioned that asphalt shingles now come in several different sizes, colors, and styles to choose from and many of them meet Energy Star standards, which allows a customer to save on their energy bills.

This roofing contractor's blog also talked about a few drawbacks to using asphalt shingle as a roofing choice and how it is still considered to be one of the most economical roof covering solutions. The blog wrapped up by briefly mentioning clay tile shingles as another type of quality roof covering. It's a roofing material that is becoming more popular because it can be molded into several different shapes and comes in a variety of color choices. Some of the advantages that are associated with it include that it's environmentally friendly roofing material, provides excellent insulation in hot climates, normally increases a home's value, and is some of the most visually appealing and enduring (lasting for roughly 80 years) roofing material that's now made. This Roper Roofing & Solar blog post can be seen in its entirety on the company website along with a variety of other informational blogs on important roofing topics.

Those that choose Roper Roofing & Solar to do their asphalt shingle replacement and other roofing work will be contracting with a company that boasts having an impressive string of glowing reviews that have been left on its services. Customer Andy Dutlinger proclaimed, "These guys were consummate professionals. Really nice people who did what they said they would - a rarity with contractors. They took care of everything and were really respectful of my home and family. They did an incredible job on my roof and did it on time. Another rarity. I had a great experience with Roper Roofing!" Jeffrey Porter stated, "We have used Roper at two different houses. They are the best roofer in Colorado. Period. They are professional, honest, and provide absolutely superior work. And when something isn't right, they fix it...immediately. I've recommended them to several friends, and everyone has had equally wonderful experiences with the company.

The company provides its reputable roofing and solar services to those in Ashwood, Lakota Hills, Golden Ridge, West Pleasant View, and many other Denver area locations. Those that would like a free quote on what it would take to repair their asphalt or other residential roof types in Denver can place a call to the company, send them an email, or fill out the quote request form on the "Contact Us" page of their website.
