

Kristin Harris SEO Opens New Cleveland Office

November 10, 2015

November 10, 2015 -

Kristin Harris SEO, based in Mayfield Heights, OH, has recently opened a second office in Cleveland, OH. The Mayfield Heights office has been hugely successful for some time now and, in order to be able to reach more clients, Kristin Harris has decided to branch out into Cleveland. Businesses there have indicated that they are pleased with the fact that they now have a local office they can go to for SEO advice and information. Further details are available on <http://www.kristinkharris.com>.

"People come to me for a variety of reasons, but the number one reason is because they want to get to the top of the Google search results," says Kristin Harris herself. "This is because I can help them get more traffic and, thereby, more revenue as well."

To use the Kristin Harris SEO services, people are encouraged to first complete her online discovery form. Following this, her team will complete an in depth video analysis that highlights areas of improvement and what the SEO company can do. This is then sent to the client and followed up with a 45 minute telephone call in which all these issues are discussed. She uses her extensive and fully up to date knowledge of Google's algorithms and other SEO techniques to ensure businesses here in Cleveland get true online domination.

To date, those who have worked with Harris have been incredibly pleased with the results. "Kristin is an expert in working with businesses to help them improve their online presence by using search engine optimization and social media marketing," says Marcelo Oleas, CEO of M4 Worldwide, Inc. "I highly recommend using Kristin if you want to increase the market share of your business and outrank your competition. She gets the job done."

Each client is provided with a tailored, unique and individual plan. This will help the business get to the top of Google search results and increase traffic and revenue. Essentially, she offers a full service SEO, which means her clients can sit back and let their customers come to them. Full details on how she achieves this are available on YouTube.
