

Dr. Mark Hickman Talks About Why It Is Now More Affordable Than Ever To Reverse A Vasectomy

May 31, 2022

New Braunfels, TX - May 31, 2022 -
Dr. Mark Hickman from Microsurgical Vasectomy Reversals, a surgery center located in New Braunfels, Texas, that is focused on fast and affordable vasectomy reversals, is urging those who?ve had a vasectomy to find out how the procedure to reverse it can be completed, at a price that is much lower than what they might expect, due to the boon of microsurgery.

Dr. Hickman talks about the cost of a vasectomy reversal by saying, ?There is a persistent perception amongst consumers that lower cost means lower quality. This remains true for several different industries. You can?t expect the quality of clothing that you pick from the bargain bin at the mall to match the exquisite craftsmanship that you get from higher-end stores. However, not everything is measured in these simple, linear terms. Scientific progress is an interesting beast that changes the paradigm of what is possible every decade or even every couple of years. Consider microsurgery, for example. Though it was invented in the 1920s, it picked up steam in the 1970s, and now it offers hitherto unimaginable advantages for all kinds of surgical procedures. Medical tooling and technology have borrowed heavily from the advancements in other areas of science such as physics and chemistry to make sure that doctors today have a broad array of surgical modalities at their disposal. This means that surgeries that were once very costly or time-consuming

are now within reach of most people. A vasectomy reversal is one such kind of operation. The cost to reverse a vasectomy today is in the lower four figures. For such a low cost, you get to enjoy all conveniences such as anesthesia and the support of advanced equipment that ensures the doctor does a clean and accurate job every time. Gone are the days when vasectomy reversals were a six-figure endeavor. You can relive your dream of becoming a father again for not more than a month of the income of an average American household. If you?ve had a vasectomy and want to have children again, there is no better time to take the leap and experience that pure bliss again. Call my clinic today and my staff will diligently answer all your questions regarding the procedure. You can even schedule a free consultation by filling out a form on our website.?

Dr. Hickman offers two all-inclusive affordable vasectomy reversal options. The $3,300 cost option of a microsurgical vasectomy reversal includes local anesthesia and an oral sedative. The $4,200 offer is performed under IV sedation and is administered by a Board Certified Anesthesiologist. Both microsurgical options are all-inclusive with no hidden fees. Dr. Hickman?s clinic also has cordial relationships with local establishments that can offer discounts to out-of-town patients who are looking for affordable accommodations in New Braunfels, Texas.

Dr. Mark Hickman has performed thousands of successful vas reversals over his 26-year career. He is an expert in laparoscopic (minimally invasive telescopic) procedures. He has also invented several surgical instruments and has been awarded a U.S. patent. Furthermore, he is also recognized as a contributor to several important minimally invasive patents. He began his private practice in New Braunfels, Texas, in 1988 and soon after became an early pioneer of laparoscopic surgery. He also had the honor of serving his country in Operation Desert Storm aboard the hospital ship USNS Mercy. In his civilian life, he is an active member of the church that he is involved with. He is passionate about the Men?s ACTS Retreat Ministry and currently serves on the Apostolate Board of the North American Province of the Missionaries of the Holy Family. He also currently serves on the Board of Directors of TIPHER (The Institute for Public Education, Health, and Research).
