

UK-Based Cloud Web Hosting Experts Sparrow Hosting Announces Move To UK-Based Data Centers

November 10, 2015

November 10, 2015 - PRESSADVANTAGE -

Sparrow Hosting, based in the UK, have announced they have moved to exclusively using UK-based data centers in order to provide high-speed cloud web hosting with wide range of features, affordable pricing, and a 30-day money back guarantee.

Lewis Bernon from Sparrow Hosting said while announcing the services that their web hosting services are completely UK-based and the company works on offering the best in class web hosting services to their clients. Focusing on providing the fast and hassle free web hosting services, the company works on their cloud servers which make sure that the customers keep getting uninterrupted services even if one server goes down. "Cloud hosting allows using power of several servers at once, resulting in high speed, reliability and uptime," says Lewis.

The web services also come with a bundle of amazing features, as reported. Explaining about these features he said that the features include one click script installs that allow any script like Wordpress, Joomla, OpenCart, BuddyPress, and more to be installed with just a click. Further, the company provides a wide range of Domains like .net, .org, .biz, .info, .com and many more to provide clients the ease to choose from. About cost, he added that the cost of these services depends of client's requirements. The company has provided many flexible cost packages with selected features and the client can choose the suitable one as per budget and requirements.

The company has been giving high-quality results through its services. "We use high-tech strategies and tools, and our team of experts is highly experienced and knowledgeable," said Lewis. Confident on the effectiveness of their services, they also have given a 30-day money back guarantee on all hosting packages to their clients in any unlikely event. Working strictly on UK-based data centers, Sparrow Hosting hopes to become a reliable name in web hosting.
