

North Texas Plumbing Is One Of The Leaders In Medical Gas Piping Installation In The DFW Area

June 08, 2022

WATAUGA, TX - June 08, 2022 -
Medical facilities in the Dallas Fort Worth area looking for trained and experienced professionals to install plumbing for medical gas can now rely on the services offered by North Texas Plumbing.

North Texas Plumbing is a leader in medical gas piping installation, maintenance, and repair in Dallas Fort Worth, and nearby areas in Texas. Several well-established medical providers such as hospitals, medical offices, health care facilities, emergency rooms, veterinary offices, veterinary surgical centers, and operating rooms in the metro area benefit from the range of medical gas delivery plumbing services that the company offers.

A spokesperson for North Texas Plumbing talks about its biggest strength by saying, ?We strive for excellence in delivering our services and always exceed our clients? expectations. We can deliver this high-quality service due to the hard work put in by our skilled and qualified personnel who we have handpicked from all over Texas. Their on-the-job experience and rigorous field training have been utilized to

set up North Texas Plumbing?s operational processes in such a way that we do a perfect job on every site that we visit. Honestly, we wouldn?t settle for anything less than that and neither should you expect anything less than flawless service if you are hiring a medical gas plumbing contractor. Medical gas piping is, like we say in the business, the lifeblood of your medical facility. Without patients having access to a consistent supply of medical gases at just the right amount of pressure, concentration, and temperature, your medical staff won?t be able to care for your patients to their best ability. Your patients? lives are in your hands and the responsibility to ensure infrastructure that is robust and resilient to meet their needs falls on your shoulders. We are here to ease that pressure, no pun intended! At North Texas Plumbing we hold ourselves to high standards because we understand the criticality of the services that we provide. Our clients agree that we meet their strict professional and technical requirements. It is time for your medical facility to benefit from the same high-quality services that your competitors have been enjoying for years now. Call us today and we will fix all your medical gas plumbing installation, maintenance, and repair problems.?

North Texas Plumbing is fully licensed and insured for medical gas work. It can work to maintain and repair an existing system or it can even work on facilities that are under construction and custom engineer a medical gas piping system from scratch. The company?s expertise extends from conception to design to completion. Some of the most common gases pumped in medical facilities are oxygen, medical air, nitrous oxide, nitrogen, carbon dioxide, and medical vacuum.

The company?s spokesperson comments on the highly technical nature of medical gas plumbing by saying, ?You can?t just have any plumber work on medical gas systems. State-guided rules and regulations dictate who is qualified to work on them. These requirements are enforced by the State of Texas?s State Board of Plumbing Examiners (TSBPE). The qualification that is required to work on med gas systems is called the Medical Gas Piping Installation Endorsement. Only those that hold a Master Plumber, Journeyman Plumber, or Plumbing Inspector license can take the examination to get certified. They first must complete a 24-hour training course provided by the TSBPE that ensures that those who qualify are competent enough to handle the demands of working on med gas systems. Here at North Texas Plumbing we only hire those who have cleared these barriers and have demonstrated their ability time and time again on the field in high-pressure situations. Again, no pun intended!?

North Texas Plumbing can be contacted at the phone number (817) 371-0709 or the email address contact@dallasfortworthplumbing.com. It provides a range of medical gas installation services including oxygen piping, nitrous oxide piping, oxygen pipe welding, manifold installation, medical air compressor installation, medical vacuum installation, take-offs, engineering, med gas outlets, alarms, and zone valve installation.
