

Dr. Mark Hickman Is Using Microsurgery To Reduce The Cost Of The Vasectomy Reversal Procedure

June 13, 2022

New Braunfels, TX - June 13, 2022 -
Dr. Hickman is offering affordable and all-inclusive packages for vasectomy reversal surgery at his clinic in New Braunfels, Texas. Dr. Hickman is helping men, who have undergone a vasectomy and have come to regret their decision, to get a second chance at experiencing the pure bliss of fatherhood again. Dr. Hickman uses the advancements in microsurgery to deliver a procedure that is quick, pain-free, and exceedingly effective at correcting a vasectomy.

Dr. Hickman describes the benefits offered by microsurgery by saying, ?Microsurgery is one of the many tools that modern medicine has developed and perfected over the years. The most obvious use of the technology is to transplant a patient?s tissue from one part of the body to another. Microsurgery has found remarkable utility in plastic surgery. It gets its name from the fact that microsurgery procedures are aided using magnifying tools. Here at Microsurgical Vasectomy Reversals at New Braunfels, Texas, we have harnessed the power of microsurgery to make the expensive and time-consuming procedure of a vasectomy reversal extremely hassle-free and affordable. We have managed to bring down the vasectomy reversal cost to such an extent that anyone can afford it with just a couple of months of planning and saving. You will be able to get back your fertility and embark on the fulfilling journey of parenthood again. You will have no more

regrets as you will get back the ability to bring new life into this beautiful world, just as God intended. Many of my patients have expressed boundless gratitude for what I have achieved for them. Regardless of the careful thought and deliberation that you may have put in when you got the vasectomy, if today you wish you had made a different decision, it is never too late to correct the course and restore your natural gift. If you are in Texas or anywhere else in the country, give my office a call and we will offer you a consultation that will set you on the path to a happy and rewarding life.?

During the microsurgical vasectomy reversal procedure, Dr. Hickman repairs the severed vas deferens with a powerful operating microscope and fine nylon sutures. The microscope used in the procedure is the Zeiss OPMI-MDM, an industry-standard operating microscope that is used all over the country for a wide range of procedures. The nylon suture used in the procedure is so thin that it even beats the thickness of human hair. A regular procedure will require around 10 to 15 stitches with ultra-fine sutures. For the vasectomy reversal, a small incision is made on each side of the scrotal skin and the two ends of the vas deferens are found and freed from the surrounding scar tissue. The two ends are then carefully aligned to form a watertight closure.

The vasectomy reversal clinic from New Braunfels, Texas, offers two all-inclusive affordable options. The microsurgical vasectomy reversal option that costs $3,300 includes local anesthesia and an oral sedative. The $4,200 offer is performed under IV sedation and is administered by a Board-Certified Anesthesiologist. Both microsurgical options are all-inclusive with no hidden fees. Patients who plan to come from out of town can talk with the clinic?s administrators to avail of discounts that they can make available due to their partnerships with local accommodation providers.

Dr. Hickman has more than 26 years of experience under his belt as a leading minimally invasive surgeon. He has performed more than 1,300 vasectomy reversals over his long and productive career. Dr. Hickman is also in touch with his faith as he is closely affiliated with the Men?s ACTS Retreat Ministry. He also currently serves on the Apostolate Board of the North American Province of the Missionaries of the Holy Family. He also served the country in Operation Desert Storm aboard the hospital ship USNS Mercy.
