

HOME Mechanix Earns Mitsubishi Diamond Contractor Status

June 20, 2022

Pittsburgh, Pennsylvania - June 20, 2022 - PRESSADVANTAGE -

HOME Mechanix, a company based in Pittsburgh, PA, is proud to announce that they have earned the Diamond Contractor status from Mitsubishi Electric. This means that customers of Mitsubishi Ductless Mini Split Systems are assured that they will get a free, in-home consultation and they will be guided as to which HVAC system is best suited for their comfort, wellness, and efficiency goals while considering the layout and size of the home. In addition, customers are assured to be provided with quick and expert installation.

"The great thing about Mitsubishi is that they provide options, most people think of just the wall mounted device when in fact Mitsubishi provides a world of options that can help any homeowner enjoy the full benefits of going ductless," says Mat Stone, President of HOME Mechanix. He adds, "I like the installation of the product, it's installation friendly. It's also robust, it has a good history, good bones, reliable and dependable for any homeowner choosing to go ductless. It's a quality product that I can 100% stand behind. The support from Mitsubishi is outstanding, both for the consumer and their contractors. They have outstanding warranties, a great product assortment and the product itself is exceptional."

They want to point out that the Mitsubishi brand of ductless mini systems is their preferred ductless system because Mitsubishi Electric has been developing advanced climate control systems designed to improve home comfort for over 30 years. Mitsubishi is also the number one selling brand of ductless systems and the customers' top choice in Pittsburgh and McCandless region. Furthermore, Mitsubishi Mini Splits are preferred by most customers because they provide extended warranties, excellent efficiency, and a wide range of products to choose from.

They have also released a YouTube video, titled "Can A Mitsubishi Mini Split Reduce Your Energy Bill in Pittsburgh PA?" to show the different ways that customers can save with a Mitsubishi Mini Split System. First of all, it doesn't require air to be forced through a maze of ductwork, which may have leaks, holes and tears that can result to an energy loss of up to 30 percent. Second, Mitsubishi employs inverter technology, which is the modern and efficient method that allows customers in Pittsburgh to save on their monthly cooling and heating expenses. Third, customers can qualify for incentives and rebates on the Ductless Mini Split Heat Pump. And many of the Mitsubishi Mini Split Systems are ENERGY STAR® rated and provide additional savings. Many homeowners in Pittsburgh have reported that they were able to save up to 50 percent on their utility bills and at the same time enjoyed better home comfort.

They want to stress that Ductless Mini Split Heat pumps are the great problem solver for homeowners in Pittsburgh. This is because they help reduce energy costs, enhance home comfort, and provide better indoor air quality (IAQ), which is perfect for anyone that has allergies, asthma, or several pets in the home. They make it easier to add an air conditioning unit for the home and the same unit can be used for heating or cooling. And there is no need to install ductwork, which may actually be a source of energy loss when there are holes or leaks. Furthermore, Mitsubishi Electric is a provider of quality mini-split heat pumps and air conditioners that offer lower energy costs, better comfort, ultra-quiet operation, zero emissions for both heating and cooling in any climate.

Founded in 2017, HOME Mechanix has earned a reputation of being a trusted provider of HVAC repair and installation for homes located in the North Hills of Pittsburgh, PA, including McCandless, Beaver, Butler, and Allegheny Counties.
