

Get More Leads Hub Offers New Inbound Online Leads Marketing Strategy

November 16, 2015

November 16, 2015 - PRESSADVANTAGE -

Get More Leads Hub, based in Albuquerque, NM, has recently started offering a new lead generation method. The method, known as 'message drops', has been fully FCC approved. The company is looking forward to helping clients get more leads online as a result of applying this new method.

"Essentially, message drops means that a marketing message is dropped into a consumer's voice mail without actually ringing their phone," says Cynthia Goranson from Get More Leads Hub. "Cold calling is a thing of the past. We know it doesn't work and consumers hate it. Message drops, however, take it to a new level. It gives a more direct link than a text message or email does, but it doesn't annoy customers. The potential truly is huge."

Business owners are starting to understand that message drops help to get their marketing messages heard. It is different from other types of marketing systems because it does not lead to any type of frustration, interrupting potential customers during their normal day. In fact, the opposite can be said because consumers can now choose to hear a marketing message when it is convenient to them, as it has landed straight into their voicemail box. As such, they hear it when they are actually open to the message itself.

"The most important thing about this new inbound marketing strategy is that it is completely legal," adds Cynthia Goranson. "FCC regulations dictated that businesses cannot use phone or text minutes from their consumers for advertising or marketing. Message drops, however, offer system to system transmission, which means the phone doesn't ring. Hence, it is fully compliant with FCC regulations. Plus, if there are any changes, we will be first to know about it as our experts are keeping their eye on any FCC releases."

Get More Leads Hub is committed to offering the message drops system solely to very exclusive clients. In order to have the best effect, they want to work only with one client in each category of business. Hence, the lead generation marketing system will only be available on a first come, first served basis.
