

Surgeon Offering Affordable Cost of Vasectomy Reversal Also on a Mission to Discourage the Birth Control Procedure

June 13, 2022

New Braunfels, TX - June 13, 2022 -

Dr. Mark Hickman, MD, FACS, a surgeon in New Braunfels, TX, wants to emphasize that he is not just offering an affordable microsurgery to undo a vasectomy but he is also keen to discourage men from undergoing vasectomy. He would start by telling them the various negative effects men who underwent vasectomy had experienced. He considers the invasive procedure of blocking tubes for carrying sperm out of a man?s body to be unnatural. He would point out to how these men felt their sense of wholeness and well-being have been reduced soon after the vasectomy. Many men have also experienced increased sensitivity and also chronic pain in their testicles after the surgery.

Dr. Hickman would also discuss the cases of men who underwent the procedure who when down the ?slippery slope? of having sexual relationships with other women because of the thought of having consequence-free sex. He wants to stress that by undergoing vasectomy, that man had put himself ahead of God?s will by controlling his own fertility. He believes that it is contrary to God?s commandment for men and women to produce children. And while married couples may have valid reasons to avoid having more children, vasectomy is not way to accomplish that goal because there are natural family planning methods.

Dr. Hickman is on a vasectomy reversal ministry to make men whole again, which is why he is offering affordable all-inclusive options for vasectomy reversal. One option is $3,300 for the microsurgical procedure, inclusive of local anesthesia and oral sedation medication. The other alternative is $4,200 for the microsurgical procedure, inclusive of IV sedation that is administered by a board certified anesthesiologist. In addition, out of town patients can take advantage of Dr. Hickman?s exclusive deals with some local hotels, enabling them to have a 50 percent reduction in the hotel accommodation rates.

Dr. Hickman says, ?An active member of my church I became involved with and passionate about the Men?s ACTS Retreat Ministry and currently serve on the Apostolate Board for the North American Province of the Missionaries of the Holy Family. I also currently serve on the Board of Directors of TIPHER (The Institute for Public Education, Health, and Research). For those who have undergone vasectomy, it is not too late. I can perform a microsurgical repair of the vas deferens, which has a high success rate.?

Dr. Hickman received his medical degree from the University of Texas Medical Branch in Galveston, TX, when he was just 23 years old. He then underwent extensive training during his general surgery residency at the University of Texas, which lasted for five years. It was during that time that he came to know about the microsurgery that is done by plastic and reconstructive surgeons. He soon discovered the various advantages offered by microsurgery, especially in minimizing the impact on the patient. Dr. Hickman then founded his private practice in New Braunfels in 1988 and he quickly gained the reputation of being one of the pioneers in laparoscopic surgery. He also taught minimally invasive surgery methods to other surgeons.

Dr. Hickman has over 26 years of experience and has gained recognition as a leading minimally invasive surgeon. Having performed more than 1,300 vasectomy reversals, he can no longer count the number of pregnancies he has helped with. And he has also ?corrected? several vasectomy reversals from other providers with a significant degree of success. And in compliance with his core values, he has decided to provide an affordable all-inclusive vasectomy reversal price. And he believes that vasectomy reversal is not just for men when want to add to their family once more. The vasectomy reversal procedure has also been known to help fight the onset of male depression resulting from the birth control procedure.

Those who are interested in learning more about the affordable cost to reverse a vasectomy provided by Dr. Hickman can check out the Microsurgical Vasectomy Reversals by Dr. Mark Hickman website, or contact them on the telephone or through email. The practice is open from 8:00 am to 5:00 pm, from Monday to Friday.
