

Encore Data Products Announces Its Participation In The Largest Yearly EduTech Conference In The USA

June 24, 2022

LAFAYETTE, CO - June 24, 2022 -
Encore Data Products, an audio-visual equipment and technology supplier from Lafayette, Colorado, has announced that it will be exhibiting at the upcoming ISTE trade show. It is encouraging business owners and industry leaders, who are planning on attending the conference, to stop by and have a chat about how it can help serve their audio-visual communication needs in the classroom.

The International Society for Technology in Education (ISTE) is on a mission to help educators better use technology to improve the quality and engagement of their education efforts across all levels of academia. It does so by providing practical guidance, evidence-based professional learning and virtual networks, organizing thought-provoking events, and constantly updating the ISTE Standards to meet the defining challenges of the current education landscape. ISTE?s year-round sponsors include big names in the EdTech industry such as Microsoft, Lego Education, BYJU?s, and Kaltura.

The 2022 ISTE trade show, called ISTE Live ?22, will be held in New Orleans, Louisiana, from June 26,

2022, through June 29, 2022. It will be a space for ISTE members, educators, and companies serving the education industry across the nation to come together, network professionally, and learn about where education is heading. There will be a live in-person conference and a virtual conference. Passes to ISTE Live ?22 are available at different price points based on the level of access they offer to the expo hall, main stage sessions, virtual live-streamed sessions, social events, off-site learning adventures, and other online resources. Educators who plan on attending ISTE Live ?22 to network with industry professionals, who will be showcasing their products and services, will need to pick a pass that offers full access to the expo hall.

A spokesperson for Encore Data Products talks about the company?s intention behind attending ISTE Live ?22 by saying, ?The ISTE trade show is recognized across the EdTech industry as 'the EdTech event of the year.' We are nothing short of excited to showcase our products and capabilities to event attendees. Getting a chance to be a part of such a large platform will let us understand the future of the education industry by talking to those who work tirelessly to shape it. We are especially interested in learning how Encore Data Products, as an audio-visual hardware and technology distributor, can help transform digital education. This is especially pertinent for us as, in a post-COVID world, it is the need of the hour. Even before the pandemic hit, more and more students all over the world were turning to online content providers to learn their course material and fill in the gaps in their knowledge that classroom instruction just cannot fill. It is not controversial to claim that we are on the cusp of an EdTech revolution. This is particularly applicable in large developing markets such as India and China, with the latter making up a little more than 44% of the total investment globally. Right here in the United States, the EdTech industry raised over $2.2 billion in funding across 130 deals. The pandemic ended up being the unexpected impetus that made students and their parents realize how they can learn just as well from home. So, as a technology distributor in the EdTech space, the future is bright, and we can?t wait to get further insights on it from the educators and industry leaders that we will meet at ISTE Live ?22.?
