Recent Backyard Bug Patrol Reviews Reflect Positively on the Company?s Mosquito & Tick Control Services

June 28, 2022

Great Falls, Virginia - June 28, 2022 -
Backyard Bug Patrol has taken steps over the years to develop some of the best mosquito and tick control methods that can be found in the Maryland, Virginia. And Washington, DC areas that they serve. This has also led them to being positively reviewed by many of their clients that take advantage of their advanced tick and mosquito control methods. Evidence of this can be found in the form of three recent reviews that were left on the company?s Google Maps Business Listing.

In the first of those reviews, Tracy Lunga-Rawls stated, ?They let you know in advance when they will be coming. They are prompt and thorough. We no longer must cower inside our house, afraid of being eaten alive by mosquitoes. Also, their tick control gives us peace of mind when it comes to our puppies.? Tracey Hance -MDH- 5-star review mentioned, ?They are great - always show up on time and their services work great.? Simpler and right to the point was Alex M?s glowing review that proclaimed the company has the ?Best mosquito treatment in Virginia!? All these reviews combined with over 113 others to rate Backyard Bug Patrol an impressive 4.9 out of a possible 5-stars on its GMB Listing.

Backyard Bug Patrol?s Google Maps Business listing is not the only place where the company is well-reviewed. High ratings are also the norm on their Yelp.com page which can be found at https://www.yelp.com/biz/backyard-bug-patrol-great-falls-2. 5-star reviews on that site include the following samples. Russ H. mentioned, ?These guys are great. Really keeps the mosquitoes out of my yard, and on occasion where there is a lot of rain, they'll come out again without charge as a part of my seasonal service. Super responsive and the office folks and techs alike are very friendly.? AM M. proclaimed, ?These guys are amazing. I spoke with Patrick who went over the products they offer. I have a sister who has an awful case of Lyme disease, so he understood my concerns and what I was looking for. The guys that came to the door to spray the yard were incredibly nice and helpful too. I have already recommended them to my family and my mom just called to tell me how great they were as well. Excellent service and very fair prices!?

Even the company?s Facebook page has 5-star reviews posted throughout it. A good example is this one from Raymond Nudo that states, ?So glad I found Backyard Bug Patrol. When I moved into my house 4 years ago, I could not even sit on my back porch due to all the bugs. Since BBP, my wife and I love being in our back yard. My highest recommendation for BBP.? The company?s Facebook page can be found at https://www.facebook.com/BackyardBugPatrol and in addition to having many rave reviews posted, this website also contains more details on all of the company?s mosquito, tick, and other pest control services and has a large variety of blog articles on important pest control topics.

John Mitchell, one of the leaders of this family-owned business, went into more details as to how they go about performing their highly rated mosquito and tick control services. He stated that they do not use any dangerous or potentially irritating chemicals when they go about doing their elite mosquito and pest control services. The barrier control method that Backyard Bug Patrol strategically applies around a yard consists of a special formula that takes advantage of the tick and mosquito killing power of a liquid that?s derived from the seeds of Chrysanthemum flowers. This 100% organic product can impact the mosquito population in a yard for up to 30-days and is completely odorless and safe. For tick control, special tunnels that rely on the nesting patterns of rodents to work (known tick carriers) will also be placed around a home to help disrupt the tick life cycle. Mitchel stated that he is always happy to go into more detail for those customers that require more information on how their Great Falls, Virginia-based company?s mosquito and tick control services work. He added that this is also explained at great length in the Backyard Bug Patrol website.
