North Texas Plumbing Offers Medical Gas Installers for Medical Gas Piping Installation in the North Texas Region

June 20, 2022

WATAUGA, TX - June 20, 2022 -
North Texas Plumbing, a commercial plumbing company based in Watauga, Texas, wants everyone to know that they have a team of medical gas installers who are ready to provide medical gas piping installation services in the North Texas region, which includes Dallas, Fort Worth and the neighboring areas. Their specialty is particularly useful during the construction or renovation of hospitals, medical offices, health care facilities, surgery centers, dental facilities, veterinary offices and veterinary surgical centers, operating rooms, emergency rooms and all other health facilities requiring medical gas. They are fully insured and licensed for medical gas work and they are also capable of custom engineering the appropriate medical gas system for a particular facility and complete the project from design to completion.

Marc Sims, owner of North Texas Plumbing, says, ?Our medical gas installers are are specifically certified by the State of Texas as installers for medical gas. Only licensed medical gas installation plumbers should install medical gas pipeline systems. North Texas Plumbing specializes in medical gas piping installation for new construction as well as renovations and repairs. We are your 24/7 365 day a year commercial plumbing service and we are dedicated to providing our customers with exceptional, punctual and professional service

backed by our 100% satisfaction guarantee.?

North Texas Plumbing ensures that their specialist commercial plumber who will be installing the medical gas plumbing system, the alarms, the piped vacuum systems and the supporting components for manifolds, outlets, zone valves, is a certified ASSE 6010 installer. These commercial gas plumbers are knowledgeable and very well experienced in the different oxygen storage techniques, including high-pressure oxygen tanks, cryogenics, and chemical compounds. All these are important because the medical gas plumbing systems in Texas need to be certified by the State Board of Plumbing Examiners.

The commercial plumbers in Dallas Fort Worth Texas from North Texas Plumbing will ensure that all of the medical gas installation that they will be providing will be in accordance with the NFPA 99 standards for positive pressure medical gas plumbing. It is important to note that these medical pipes will be used for delivering different kinds of medical grade gases from a utility room where the gases are kept in tanks and then delivered through gas pipes to various locations in the medical facility. The fire safety standard requires that the appropriate levels of protection be provided based on the hazards or risks to patients, staff, and visitors, to minimize the possibility of fires, explosions, and electrical accidents.

The team of medical plumbing specialists from North Texas Plumbing will make sure that emergency shut-off valves and zone valves are correctly installed in the system for safety purposes. These valves are to be used to stop the flow of the medical gas in a certain part of the medical gas piping system in the event that there is a leak or an accident or when there is a fire, and also when they need to service the system. Valves may also be installed at the entrance to departments where emergency pull-out windows can be installed so that these valves can easily be accessed.

Established in 2013, North Texas Plumbing offers commercial plumbing services for businesses in the North Texas area, including the Dallas-Fort Worth metroplex. They specialize in offering: grease trap installation; water line rerouting; drain line repiping; water jet pipe cleaning; medical gas plumbing; water main repair and replacement; foundation leaks and slab leak repair; sewer line repair and replacement; tankless water heater installation; gas line installation; gas line repair; drain cleaning; and more. The medical gas piping installation that they provide include: oxygen piping; nitrous oxide piping; oxygen pipe welding; medical gas manifold installation; medical air compressor installation; medical vacuum installation; take-offs and engineering; and medical gas outlet, alarm, zone valve installation.
