American Dumpster of Shelby is pleased to announce that they now offer a wider variety of dumpster rental services than ever before. It's a trait that has led to them being a leading dumpster rental Shelby NC option for trash and junk disposal services. They have helped many commercial companies, homeowners, and contractors in Shelby and the surrounding areas seamlessly get rid of their rubbish and unwanted or unused items. The co-owner of the company, Blake Johnson, says, "Dumpster rental used to be a one-size-fits-all type of business. That's something that is no longer the case in our line of work. Over the last few decades our dumpster rentals services have undergone a major transformation and we now cater to a wider variety of clients than ever before. The way that we have been able to accomplish this is by offering a wider and more diverse array of dumpster rental services than ever before."

The owner went on to say that it all starts with their many dumpster size options. This includes their smallest size L 14' x W 8' x H 4' dumpster which can hold up to 1 ½ tons of trash or debris. They also have a L 14' x W 8' x H 5' dumpster which can handle 2-tons of trash or debris and their largest size L 22' x W 8' x H 5' dumpster with a 3-ton weight capacity. Adding to the company's versatile services include additional days

being added onto a standard 7-day dumpster rental for a small fee and extra tonnage can also be placed in a trash bin for a reasonable additional charge. Johnson says that they can now also responsibly dispose of a wide variety of trash and junk items too. This includes refrigerator disposal, garbage removal, mattress disposal, foreclosure items, construction waste, yard debris, trash, appliances, e-waste such as tv's, furniture, and even hot tubs. The owner added he is always happy to answer any questions about whether or not they can dispose of an item or a category of trash for someone. He also talked about how he has experienced drivers who are experts when it comes to locating their roll-off style dumpsters anywhere at a jobsite where it will not cause damage to pavement, underground pipes, or buried wires.
