

Holistic Dentist in Utah Announces AcuLase

July 07, 2022

Bountiful, Utah - July 07, 2022 -
Dental Solutions, a dental office in Bountiful, UT, is proud to announce that renowned holistic dentist Dr. Judson Wall has developed a custom laser protocol, AcuLase, which employs laser or LED light to activate acupuncture points on the human body in order to get a positive physiologic result. Studies have shown that AcuLase offers several benefits in dentistry, such as: reducing pain from surgical procedures, increasing likelihood of success in keeping teeth alive when restoring deep cavities, reducing dental anxiety, aiding in smoking cessation, increasing salivary flow, improving sleep, improving bone to implant contact, decreases time and severity of cold sores, improving digestion, decreases tooth sensitivity, and accelerates tooth movement. AcuLase was developed by Dr. Judson Wall and in 2022, and his students will have the opportunity to learn how to apply AcuLase as a treatment protocol in their practice.

According to traditional Chinese medicine, all of the organs in the body are located on meridians or circuits. If there is a disease, some part of the circuit is open, which disrupts the appropriate functioning of any organ that is located on the affected meridian. When the acupuncture points are stimulated, they ?close? the circuit of the meridian on which are located with the result that they provide ?qi? or energy to the organs on the meridian

AcuLase may also be used on the ear to provide what is known as auriculotherapy. This has several benefits, such as: decreasing insomnia, decreasing pain, improving sleep, balancing autonomic nervous system, decreasing anxiety, improving gut function, decreasing cravings, increasing brain oxygenation, decreasing depression, decreasing blood pressure and heart rate, decreasing inflammation, increasing bone density, decreasing nerve excitability, improving mood, increasing beta-amyloid clearing, increasing salivary flow, increasing microcirculation, and improving sexual dysfunction.

Dr. Judson B. Wall has been providing dental services for more than 20 years. He graduated from the University of Utah and obtained his Doctor of Dental Surgery degree from the West Virginia University School of Dentistry. His list of credential and accomplishments and credentials include: accreditation by the International Academy of Oral Medicine and Toxicology; a fellowship with the Academy of General Dentistry; a fellowship with the American Academy of Craniofacial Pain; and an associate fellowship with the World Clinical Laser Institute. He is also a world renowned lecturer on zirconia implants, TMJ dysfunction, metal-free dentistry, and sleep appliance therapy. He also teaches dentists from various parts of the globe on how to perform holistic dentistry.

Dental Solutions offers natural holistic dentistry, diagnostic services, and gentle general dentistry. Natural dentistry does not only focus on the teeth, gums and bone in the mouth but also on overall health. This is because a patient?s lifestyle choices and daily habits can affect oral health. And the health of the gums, teeth, and bones in the mouth respond everyday to the kinds of food the patient eats, the medications taken, the stress levels, and many other factors. At Dental Solutions, they apply various technique and methods to boost the patient?s overall health and oral health at the same time.

Dr. Wall also offers NightLase therapy, which is a laser treatment that renatures collagen as a way to help patients who snore and who have sleep apnea without having to undergo surgery. They also offer various kinds of treatment for cavitations, which is a hole in the bone. And they can also provide safe removal of mercury amalgam fillings. This is important because mercury makes up approximately 50 percent of an amalgam filling and is highly toxic.
