

Dr. Mark Hickman Is Easing Fears About The Cost Of A Vasectomy Reversal

June 27, 2022

New Braunfels, TX - June 27, 2022 -
Dr. Mark Hickman from Microsurgical Vasectomy Reversals in New Braunfels, Texas, is offering his surgical expertise to men who?ve had a vasectomy and now wish to reverse the procedure to once again get the chance to have children. He is also addressing the concern about the high cost that some patients associate with the vasectomy reversal procedure.

Dr. Hickman says, ?There was once a time when the cost to reverse a vasectomy was upwards of $100,000. However, science is a beautiful thing. Every year we make profound discoveries and refine existing procedures to better treat the body and its afflictions, even if, as in the case of a vasectomy, it was self-inflicted. As we perfect our craft, the benefits are passed on to our patients in terms of surgical procedures that are quicker, cause less pain, and cost way lesser than the traditional options. The same extends to vasectomy reversals. The magic word here is microsurgery, a general term for surgical procedures that are carried out using a microscope. It allows us to operate on the minute network of muscles and blood vessels that dot the entire human body. The advent of microsurgery opened unprecedented possibilities for the medical field and affordable vasectomy reversals are just one of its many gifts. We can now perform vasectomy reversals at a very reasonable cost. The procedure only lasts a few hours and allows

the patient to resume their daily schedule in as little as a week. If you have undergone a vasectomy at some point in your life and want to experience the pure bliss of fatherhood again, give my office in New Braunfels a call. We will set you up with a qualified medical professional who will walk you through the details of the procedure and dispel all the myths surrounding it. We are confident that once you go through with the vasectomy reversal procedure and get back your God-given gifts, you will see life in a whole new light.?

Dr. Hickman offers two all-inclusive affordable vasectomy reversal options. The microsurgical vasectomy reversal cost option of $3,300 includes local anesthesia and an oral sedative. The $4,200 offer is performed under IV sedation and is administered by a Board-Certified Anesthesiologist. Both microsurgical options are all-inclusive with no hidden fees. Dr. Hickman, who has performed more than 1300 successful vas reversals over his 26-year career, attributes his passion for helping men reverse their vasectomies to his upbringing as a Christian. He is very close to his Christian roots. He is an active member of the church that he is involved with. He is passionate about the Men?s ACTS Retreat Ministry and currently serves on the Apostolate Board of the North American Province of the Missionaries of the Holy Family. He also currently serves on the Board of Directors of TIPHER (The Institute for Public Education, Health, and Research).

One of his patient?s spouses thanked Dr. Hickman in her testimonial by saying, ?I wanted to give you a baby update. My husband and I welcomed our precious baby girl into the world?Even though she was 5 weeks early, she passed all of her newborn screenings and tests, did not require and breathing or feeding assistance and spent no time in the NICU. She was discharged the same day I was. The blessing, aside from her being completely healthy, is that she arrived one day prior to my husband?s and my 10th wedding anniversary and a year later to the date that we experienced our first miscarriage. God used her birth to be a reminder to us that he gives ?beauty for ashes.? Dr. Hickman, while we know all glory belongs to God, our family has been blessed by your ministry and your willingness to assist families in restoring the privilege of fertility.?
