A spokesperson for Cestari talks about the promotional offer by saying, ?First of all, with the successful launch of the Glass Pasta Jar with Bamboo Top, we believe that we have succeeded in offering the best pasta jar available for sale on Amazon right now. The promotional offer that we are running with the product greatly enhances its utility and has massive potential to change the way our customers organize their homes. Our brand has always been all about providing products that streamline food prep and cleanup. The Cestari glass pasta jar was also designed with this simple goal in mind and engineered with high-quality materials to make it a food-safe storage choice. We are confident that once it arrives you will not want to go back to storing pasta in store-bought packaging or flimsy and unsafe plastic containers. At the same time, we want our customers to make efficient use of their kitchen space so that they can spend less time in it and more time enjoying what they create, with their family and friends. To help our pasta jar buyers better achieve this goal, we chose to include Cestari?s very own chalk labels with every purchase. It will help them organize anything they can imagine, from jars to bottles to bins, in every room of the house including the kitchen, bathroom, office, and more. We hope that this promotional offer will compel even more buyers to give the Cestari glass pasta jar with bamboo top a chance. So, if you are on the fence, please pick up the product from Amazon soon, while the pasta jar promo is still applicable. Make sure to select the promotion on the Amazon listing before proceeding to the checkout page.?

The Cestari Chalkboard Labels lend the appearance of blackboards, with the convenience and ease of stickers that can be erased and reused. The chalkboard labels are made from high-quality, phthalate-free erasable matte black PVC. Cestari says that the premium vinyl looks great for years. The choice of the waterproof adhesive also means that it is safe to wash a jar with a label attached right in the dishwasher. If the label has been attached to an item for a while, customers can heat it briefly with a hair dryer to loosen the adhesive. However, the labels stick permanently to porous surfaces such as paper and wood.
