

Google Drive Easier to Organize with GemShelf

November 11, 2015

November 11, 2015 - PRESSADVANTAGE -

New York, NY - GemShelf, the innovative knowledge management platform for groups, will bridge the gap between cloud based file-sharing system, Google Drive, with their highly anticipated integration this December.

GemShelf is a web platform that is disrupting how organizations manage their critical knowledge by making information easy to find and organize across the cloud.

"We are extremely excited to announce that we're starting this integration," said GemShelf CEO, Sedarius Tekara Perrotta. "Our customers are the biggest driver of this decision. We can't wait to make it easier for them to manage and organize all of their Google Drive files."

This Google Drive integration will enable users to sync their GemShelf account with their Google Drive account, giving users the ability to quickly retrieve their Drive content via GemShelf. Users will have the

benefit of seamlessly harnessing the powerful collaboration features of Google Drive, whilst utilizing the powerful knowledge organization and management capability of GemShelf.

This integration aligns with GemShelf's core vision: to provide a single place where organizations can manage and find all of their content in the cloud.

The Google Drive integration will be released into the market in December of 2015.
