

City Web Company Announces New Services For WordPress Support

Denver Company Announces New Services For WordPress Support

November 16, 2015

November 16, 2015 - PRESSADVANTAGE -

A digital marketing company based in Denver, CO, City Web Company has announced new WordPress support and maintenance services. The company was founded in 2008 and offers a wide range of online services. They state that with the millions of users now operating on a WordPress platform, their goal is to assist with troubleshooting and helping businesses to keep their online presence up and running.

Matt Gronbeck, a spokesperson for City Web Company, released a statement about the service launch, saying that, "Millions of businesses use WordPress for their company's website but most don't know how to use the platform, let alone make the necessary WordPress core file and plugin updates to prevent their sites from being hacked."

Gronbeck says that those not familiar with the platform are likely to have issues right out of the box. Although WordPress is the most commonly used content management system, he says that not everyone is going to find it easy to enjoy the benefits of the platform. "Our service aims to provide very affordable WordPress help for these companies," he states.

With the new service, the company plans to offer unlimited support tasks for things such as content updates, server or DNS changes, installing plugins, and general questions and assistance. They are also providing automated security scans to check for injections and malicious codes, as well as malware.

Assistance for plugin and theme updates will be helpful for companies in keeping their sites secure and ensuring that all of the latest features are installed. The company will also provide daily backups to ensure that files are securely stored onsite and offsite, giving businesses the opportunity to restore websites to a previous version at any time.

Gronbeck states, "We have an experienced support team that knows WordPress. We've been doing this for years, and want businesses to know that their sites are safe in our hands."

He also says that the newly released services will be affordable enough for smaller businesses to fit nicely into their budget. More about the list of WordPress services that are offered, along with other services from City Web Company, can be seen on their official website.
