

Leading Custom Software Development Company, Cloud Custom Solutions Launches Their Brand-New Bilingual Website

July 13, 2022

July 13, 2022 - PRESSADVANTAGE -

Ben Fatola, CEO of Cloud Custom Solutions, a leading cloud technology company that provides innovative software as a service (SAAS) solutions based out of Arizona, unveiled their latest bilingual, English and Spanish, website: <https://www.cloudcustomsolutions.com/>

When asked what makes Cloud Custom Solutions stand out, Mr. Fatola stated that, "Cloud Custom Solutions is a certified minority-owned software development company based in Gilbert, Arizona. We specialize in delivering exceptional quality custom software solutions based on cloud technology for large corporations, organizations, government entities and non-profit organizations.

"With over 10+ years of experience in the industry, we strictly adhere to the best practices in the software development industry and produce highly customized web-based software solutions catering to businesses of all sizes."

Some of the key services CCS delivers include:

Enterprise Software Development and Managed Services

These include smart IT solutions to streamline business processes and minimize operational costs.

CCS starts with developing an IT roadmap and digital strategy with specialized services in ERP and enterprise application development and management, SAP and 3rd-Party apps consulting services, change management solutions (certified in Prosci ADKAR® Model), web, product and mobile application development and management, security monitoring, governance & threat management, enterprise network, infrastructure and application management and more.

Cloud Custom Solutions also has over 10+ years of collaboration and consulting experience with Syntax, a leading managed cloud provider for mission critical enterprise applications, serving businesses across the globe.

Cloud Services, Infrastructure and Management

From strategy through execution, CCS designs, develops and deploys futuristic cloud technologies and customized architectural solutions.

They offer cloud strategy, implementation and optimization, cloud migration and deployment, cloud infrastructure, networking and security management and cloud management & support across the public, hybrid, private and multi-cloud.

Data Analytics and Real-Time Monitoring

CCS understands that today data is everything. Their products include data staging, transformation, analysis, modelling and dashboard services with a keen focus on data visualization and reporting, end-to-end data transformation, data science and cloud data, artificial intelligence/machine learning (AI/ML) and data governance.

QA Testing and Automation Strategies

The right testing and automation strategy can bring down costs, achieve milestones and increase business efficiency. CCS works with organizations to identify critical business processes based on project scope and release and develops QA strategies for functional and performance testing, robust automation framework for

regression testing, end-to-end automated tests and 24/7 monitoring and enterprise ERP and SAP testing and automation.
