

BRI Nutrition Top Rated Testosterone Booster: FASEB Journal Points to Relationship Between Low Testosterone and Obesity in Women

November 12, 2015

November 12, 2015 - PRESSADVANTAGE -

BRI Nutrition's (<http://brinutrition.com>) Top Rated Testosterone Booster is a highly ranked T-Booster, primarily sold through Amazon.com. BRI Nutrition's Top Rated Testosterone Booster uses a proprietary support formula that contains a variety of supplements all designed to increase the intake and use of their T-Booster, including Bulgarian Tribulus Terrestris Saponins; a complex extract loaded with Protodioscin .

A new study released in the April 2015 journal by the Federation of American Societies for Experimental Biology suggests a link between testosterone (and other androgens), atherosclerosis and obesity in females.

When researchers compared female mice (one with and one without an androgen receptor), it was found that the female mice without the androgen receptor became obese through the accumulation of high levels of fat in the blood and also had elevated levels of atherosclerosis. When scientists gave the female mice androgens, the body fat lowered, as did the amount of atherosclerosis.

Åsa Tivesten, M.D., Ph.D., a researcher that took part in the research conducted at the Wallenberg

Laboratory for Cardiovascular and Metabolic Research at Sahlgrenska University Hospital in Göteborg, Sweden, said, "We hope that our study will contribute to intensified research efforts on the definition of androgen deficiency in women (e.g. which levels of androgens in the blood should be considered too low?), the consequences androgen deficiency may have for women's health and ultimately, whether androgen deficient women may need androgen treatment for normalization of their androgen levels in order to maintain long-term cardiovascular and overall health,"

Favored by tens of thousands, BRI Nutrition's Top Rated Testosterone Booster is great for workout power, recovery, vitality and overall health & life wellness. For more information on their Top Rated Testosterone Booster and other BRI Nutrition products, visit BRI at Amazon.com.

About BRI Nutrition

BRI Nutrition, based in California, is a manufacturer and distributor of a variety of health supplements such as Phytoceramides and Resveratrol. The company has been revolutionizing high-quality nutritional and natural supplements for years, with the mission to aid people in their pursuit of optimum health and wellness. Their products are manufactured in the USA, under an FDA-registered production facility.
