

EXOUS Bodygear's EX-701 Knee Support Reaches 142 5-Star Reviews And Top Rating on Amazon.co.uk

November 12, 2015

November 12, 2015 - PRESSADVANTAGE -

The EX-701 Performance Knee support by EXOUS Bodygear, which was launched in the UK on amazon.co.uk in February 2015, is excited to announce that it has now reached 142 positive 5-star reviews making it one of the top-rated knee supports on Amazon with a consumer rating of 4.6/5.0 stars.

The Amazon.co.uk marketplace lists some 3,639 products under the knee brace category from various price points and a multitude of different brands. The EX-701 is a neoprene style open patella knee support brace which has an adjustable one size fit using velcro straps to accommodate different knee sizes.

Mannie Kaur, EXOUS Bodygear's Brand Manager, had the following statement on the success of the product: "Reaching a 4.6 rating in amongst 3600-odd other knee braces in such a short time is fantastic. The consumer knows best and we have priced the EX-701 very competitively with very unique features and premium materials giving it much better value which is now translating into consistent 5-star reviews and sales. We are now expanding the product into new market places such as France and Germany in the forthcoming weeks."

Consumers wishing to find out more about the EX-701 knee support are encouraged by the brand to view their Amazon store or to view educational videos on their brand YouTube channel where the key differences on the design of the EX-701 knee support brace over generic knee braces can be seen.
