Theragem Fusion Light Therapy Device to be Featured at A4M Conference in Las Vegas

November 13, 2015

November 13, 2015 -

Las Vegas, NV - The Theragem Fusion Light Therapy device will be featured at the 23rd Annual World Congress on Anti-Aging, Regenerative and Aesthetic Medicine December 11 -13 at the Venetian conference center. Medica Health International CEO, Catharina Jansma, will be on hand to demonstrate and discuss its many applications in anti-aging therapy.

Also known as the A4M, the world's largest and most acclaimed Anti-Aging conference will present a wide range of leading edge products typically targeted at specific applications. What makes the Theragem Fusion Light Therapy device unique is how it complements virtually everything on display at the exhibition.

Because it addresses the root cause of imbalances in body, mind, and spirit, it works at the level well beneath symptoms. As such it can be used as a stand alone therapy or in conjunction with physical, nutritional, emotional and beauty treatments. It's a truly integrative and holistic approach to health and wellness.

The Theragem is not a laser device, but uses polychromatic or full spectrum light in combination with color, precious and semi-precious gemstones, EMF frequencies and other elements. It's FDA 510K

registered, and used at leading clinics around the world. It's quite simple to operate, but applications are wide ranging.

Fusion Light Therapy is best experienced first hand, and attendees at the A4M conference will have that opportunity. Using advanced heart rate variability testing, the impact it has on the body can be seen immediately. Visit the Medica Health website or call 404-482-1968 for more information.
