

## Knife And Carry's Store Announces Grand Opening

*August 17, 2022*

August 17, 2022 - PRESSADVANTAGE -

Grommet's Knife & Carry, based in California, is pleased to invite the community to their Grand Opening in Riverside. Formerly situated in Moreno Valley, CA, customers and knife enthusiasts will soon be able to find their favorite store at the Freeway Industrial Park.

The store's last day at their original Moreno Valley address will be August 21st, 2022. A number of events and giveaways are planned for the subsequent Grand Opening, which is scheduled for September 10th, and the store is pleased to share that everyone is invited to attend. In fact, they are confident that they will draw large crowds once word gets out who will be making an appearance. Those who are familiar with the industry's most notable names will instantly recognize Benchmade, for instance, manufacturer of some of the best outdoor, hunting and everyday carry (EDC) knives on the market. They will also be accompanied by another industry giant, none other than Greg Medford of Medford Knife & Tool. Despite being a newer arrival, Medford and his team have already proven themselves more than capable of designing and crafting knives that unify both form and function.

According to Grommet's Knife & Carry knife store, event attendees will be able to talk to both Benchmade and Medford over the course of the celebration, with the former even going so far to offer free laser engraving on site for any Benchmade brand knives. For his part, Medford will be in store to help

celebrate Grommet's being added as Medford's newest Pro Shop.

Knife & Carry has worked hard to make their Grand Opening a memorable success, and they want everyone who visits on this special day to have something to mark the occasion by. While anyone can host a contest or giveaway, few will be able to boast the pedigree of items the store will have on offer ? prize winners will be competing for products from Chris Reeve Knives, Pro-Tech Knives, Spartan Blades USA, Hinderer Knives, Work Sharp and more.

Notably, regular customers who visit specifically to make a purchase on this day (or who spot an item they like during their visit) may also be eligible for gifts with their purchase. On top of this, the store says they have planned giveaways for those who make an appearance simply to show their support, and this includes T-shirts, hats, stickers and so on. Should anyone miss the Grand Opening, however, they are always welcome to stop by later on to take a look at the store's expansive and varied inventory.

Knife & Carry strongly believes in offering an exceptional standard of customer service, and they intend to keep building their reputation for being a haven for knifer buyers at their new location. The site may have changed, they say, but customers can still expect the trademark Knife and Carry experience.

As J. Hall says in their review, "I only use them for their sharpening services, but that alone is worth the 5 Stars. Seriously. I pay about \$25 for my chef's knife, paring knife and slicer. They get it done quickly, and the knives are actually sharp afterward. Anyone who actually gets their knives sharpened knows how much of a difference this makes and how surprisingly few local places there are to get this done correctly. Thanks, as always, Grommet's."

While they always recommend that customers visit their premises and look at the knives they are interested in up close, the store can also be reached online at any time. Here, a full selection of their products can be found, which includes all their knives as well as custom leather wallets, robust watches, rugged multitools and even Made-In-USA notepads and pens. The store is also proud to share that the vast majority of their knives are made in the US, and the remainder are sourced exclusively from regions or craftsmen that are world-famous for the quality of their knives.

Anyone interested in following the store's latest news and announcements may join the Knife & Carry Instagram channel today. Along with their favorite knives, the store makes it a point to share tips on care, maintenance and more on this platform, and they are known for staying in touch with their community. On the other hand, customers may reach the store by phone as well.
