

# Infident Dental Clinic Continues to Revolutionize Orthodontic Treatment with Dental Invisalign Treatment

*August 04, 2022*

August 04, 2022 -
Nicosia, Cyprus: For over two decades, Infident Dental Clinic has been a frontrunner in the local dental practice, providing cutting-edge orthodontic and restorative treatments. Recently, the clinic has announced several innovations in their treatment planning process, utilizing the Invisalign system to provide optimal patient results. Thanks to these new advances, Infident Clinic can offer faster and more comfortable treatment for patients of all ages, with life-changing results.

Dental Invisalign treatment is a viable alternative to traditional braces. Invisalign uses clear aligners to gradually straighten teeth, and many patients find it less invasive and more comfortable than other methods. This dental treatment is a technological breakthrough in aligning teeth that will make braces or metal fittings a thing of the past.

Patients in Cyprus can now ask for Invisalign treatment at Infident Dental Clinic Nicosia. The innovative design of this system makes it possible for patients to enjoy all of the benefits of straight teeth without

changes to their facial appearance or speech impediment.

Invisible orthodontics also helps avoid one of the most significant discomforts that come with traditional orthodontics ? the brackets and wires can poke and scrape the insides of your mouth, causing painful sores. Infident Dental Clinic, with its invisible orthodontic treatments, boasts a high success rate, with over a thousand completed treatments and a 95% customer satisfaction rate.

Since its inception, Infident Clinic has continuously been striving to provide its patients with the latest and most excellent dental treatments. The treatment plan is customized by a certified orthodontist using state-of-the-art digital scanning and regular monitoring to ensure the best results.
