

Orange County Motorcycle Accident Lawyer Alexander Napolin Talks About The Risks Of Riding Motorcycles

September 02, 2022

Orange, California - September 02, 2022 - PRESSADVANTAGE -

Motorcycle riders in Orange County who have suffered injuries due to the negligence of another driver on the road can turn to Alexander Napolin Esquire, a personal injury attorney who promises to take the fight to the party at fault. Alexander Napolin's law firm can also help clients seeking assistance for other types of personal injury cases such as those searching online for "Injured Child Lawyer Near Me Orange."

California's picturesque oceanside roadways are a dream for anyone who enjoys the thrill and freedom that two wheels and a loud rumbling engine bring. Inevitably, California has the highest number of registered private and commercial motorcycles in the country. However, along with the fun of riding a motorcycle also comes the significant risk of riding one that can be easily ascertained by looking at the state's accident statistics.

Motorcycle riders suffer from the highest rate of casualties when compared to the occupants of any other type of vehicle. Even though they make up just 3% of all registered vehicles, they account for over 5% of

highway-related deaths. According to the California Highway Patrol, 88% of all motorcycle accidents lead to injury and 5% of those lead to a fatality.

When discussing why motorcycles are considered dangerous, Alexander Napolin says, "Due to the way they are built, the way they are designed to be maneuvered, the high speeds that they can reach, and the complete lack of safety afforded to the rider, it is no surprise that motorcycle riders have a fatality rate that is almost four times that of those riding an enclosed vehicle such as a car or a truck. Moving beyond the fact that there is no frame, airbag, or seatbelt to secure the rider in case of an accident, motorcycles are also not as easy to spot by other drivers on the street due to their small size. Finally, riding on just two wheels is inherently dangerous as it requires the rider to always exert control over the motorcycle to maintain their balance. At high speeds, even the slightest miscalculation or loss of control can have disastrous effects and can send the rider sliding over the asphalt."

On its website, Alexander Napolin, also regarded as the best truck accident lawyer Orange County has to offer, suggests preventative strategies that motorcyclists can use to reduce the risk of accidents. First, motorcycle riders need to be always vigilant and hyper-focused on the road. There is no room for distracted driving while on a motorcycle. Next, motorcyclists should keep a safe distance between themselves and other vehicles on the road to give them the time to correct course and avoid an accident. It is an essential aspect of defensive driving while on a motorcycle and can be the difference between life and death. Finally, since motorcyclists are already handicapped due to a small vehicle that makes them less visible to others on the road, they should strictly follow all the traffic rules so that they are always out of the way of other drivers.

Alexander Napolin talks about how he can help motorcyclists in Orange County, who have been injured due to another party's negligence, by saying, "Despite your best efforts to practice safe driving, there is no predicting when you will become the victim of a negligent car operator. Motorcycle riders tend to get a bad rap due to a few irresponsible riders who not only endanger themselves by driving rashly but also put the lives of others on the road at risk. It can be difficult to prove negligence from the party-at-fault due to this tarnished reputation. As an experienced motorcycle accident attorney, I have helped hundreds of clients fight this mischaracterization and prove beyond a shadow of a doubt that their injuries were the direct result of the negligence of other drivers who owed them the duty of care."
