

Dr. Mark Hickman Now Offering Procedures To Reverse A Vasectomy

August 24, 2022

New Braunfels, TX - August 24, 2022 - PRESSADVANTAGE -

Dr. Mark Hickman, MD, FACS, a surgeon based in New Braunfels, TX, is pleased to be offering affordable vasectomy reversals at his clinic, Microsurgical Vasectomy Reversals. The all-inclusive packages being provided give men who have undergone a vasectomy and regretted their decision a second chance at experiencing the joy of fatherhood again. Dr. Hickman makes it a point to use the most recent advancements in microsurgery in order to deliver a procedure that is quick, relatively painless and also extremely effective at correcting a vasectomy.

Microsurgery is one of the many tools that modern medicine has developed and perfected over the years, and transplanting a patient's tissue from one area of the body to another is the most obvious application of the technology. Plastic surgery has remarkably benefited from microsurgery as well. Its name comes from the fact that magnifying tools are used to assist in microsurgery procedures.

The team at Microsurgical Vasectomy Reversals has used the power of microsurgery to streamline and reduce the cost of the time- and money-consuming reversal process. Dr. Hickman has succeeded in lowering the cost of reversing a vasectomy to the point where anyone can afford it with just a few months of

preparation and saving. Regaining fertility will allow a patient to start the rewarding journey of parenthood again. Numerous patients of Dr. Hickman have expressed their unending gratitude for everything that he has done for them. No matter how much thinking and consideration someone may have put into getting a vasectomy, if they later regret their choice, it is never too late to change their mind and regain their natural ability. By calling the Microsurgical Vasectomy Reversals clinic, patients in Texas or anywhere else in the country may schedule a consultation that will put them on the road to a content and fulfilling life.

Two reasonable all-inclusive packages are available from the clinic. Local anesthetic and an oral sedative are included in the \$3,300 microsurgical option. The IV sedation procedure for the \$4,200 offer is carried out by a Board-Certified Anesthesiologist. Both microsurgical alternatives come with no additional costs and are all-inclusive. Patients who intend to travel from outside the area can speak with the clinic's managers to learn about the savings they can offer as a result of their affiliations with local lodging establishments. Using a strong operating microscope and tiny nylon sutures, Dr. Hickman performs a microsurgical vasectomy reversal surgery to restore the damaged vas deferens.

The Zeiss OPMI-MDM operating microscope is utilized in the process; it is a widely used operating microscope that is known throughout the nation for its role in a variety of procedures. The sutures are even finer than the thickness of human hair. With ultra-fine sutures, a routine surgery will need about 10 to 15 stitches. The vas deferens is located and separated from the surrounding scar tissue for the reversal process with a tiny incision (done on each side of the scrotal skin). A watertight seal is created by precisely aligning the two ends.

When he was only 23 years old, Dr. Hickman graduated from the University of Texas Medical Branch in Galveston, Texas, with a medical degree. The University of Texas' general surgery residency was the next step in his intensive training. He first became aware of the many benefits of microsurgery during this fellowship, particularly given its greatly diminished impact on the patient. Later, in 1988, Dr. Hickman opened a private clinic in New Braunfels and soon rose to prominence as a leader in laparoscopic surgery. Additionally, he created a number of surgical instruments and was awarded a number of patents, many of which are used in minimally invasive surgery. Dr. Hickman has nearly 30 years of experience under his belt as a leading minimally invasive surgeon, having performed over 1,300 vasectomy reversals over his long and productive career.

Those who would like to know more about the affordable vasectomy reversal procedures available through Dr. Hickman can check out the Microsurgical Vasectomy Reversals website or contact the clinic via phone or

email. The clinic is open from 8:00 am to 5:00 pm, from Monday to Friday.
