Lumos POS Announces iPad Point Of Sale With E-commerce Version 2.0

March 27, 2015

March 27, 2015 - PRESSADVANTAGE -

Lumos POS, a San Diego, California based software company, has announced the availability of their latest upgrade their iPad Point of Sale platform, Lumos 2.0. The major advancement in Lumos 2.0 release is the seamless integration of mobile responsive E-commerce that links in-store inventory and customer data seamlessly for small retail merchants.

The Lumos 2.0 iPad POS enables retail merchants to manage their in store operations including inventory, customer loyalty programs, gift cards, time & attendance, marketing and performance reporting all in one place while building a professional looking online E-commerce store, that is linked to their in store inventory and managed from their iPad. With real time e-commerce and a completely unified suite of tools for managing a retail location Lumos 2.0 is unlike any competitive product on the market.

Lumos 2.0 iPad POS is a full featured e-commerce site builder and retail point of sale that dynamically links previously unconnected systems into one cohesive and easy to use package. Lumos POS has made it clear that nobody else in the POS industry has anything close to this on the market yet.

The competitive features of the iPad for retail POS application include the ability to have one central point for marketing, back office, HR, in store sales and E-commerce. The price of the system starts at a cost of $69.99 monthly, with instant access to all of the above mentioned functionality, Lumos POS offers a 30-day free trial period for retailers and ecommerce users who are interested in trying this system for themselves.
