

Roofing In Towson Maryland Company Talks About the Changes in Asphalt Shingle Roof Replacement

September 06, 2022

September 06, 2022 -

Towson Roofing Pros has a long history of satisfying its Baltimore, MD area roofing customers. Much of this stems from the quality shingle roof replacement work that the company does. It has experienced crews that know the best methods when it comes to putting down a new layer of shingles over any type of sloped roof. They also now have more types of shingles that their customers can choose from than ever before. A representative for this Towson roofer says, ?Many of those who come to get roof replacement work done by us are pleasantly surprised with the wide variety of choices they have when it comes to the type of shingle they will have put down on their new roofs.?

The company representative acknowledged that years ago when having asphalt shingles put down on a roof, it was definitely a one size fits all type of project. He went on to emphasize that?s no longer the case. Now people who are getting a roof replacement done have many choices when it comes to the type of shingle they will put down. Customers now have such choices for the shingle they will use during roof replacement as more traditional 3-tab shingles or shingles that have additives in them that will help make them much more durable. According to the company representative, they also have shingles that are made to mimic the looks of more expensive roofing materials such as slate or wood but can be applied at a fraction of the cost of

those other roofing materials. He says there is a greater selection of shingle colors and textures than ever before. It was also stated by him that no matter what type of shingle a homeowner chooses to use for their roof replacement, they will still be selecting one of the least expensive ways to get their roof watertight and looking good again. That?s because asphalt shingles have always been a reliable and economical roof covering.

Those that have contracted with this roofing in Towson Maryland company to get their roof replacements done have been very pleased with the results. Page Jordan stated in her 5-star review, ?Towson Roofing Pros were great. I love the installed roof and I can't believe how quickly they put it on. I thought I'd need to take two days off from work but turned out I only had to take off one because they showed up early and finished before sunset. They were very professional, quick, and did a good job cleaning up! I've recommended them to a few coworkers who are looking to have new roofs put on around Baltimore.? Marion Saltz proclaimed, ?I would rate higher than 5 stars if I could. Towson Roofing Pros is the absolute best roofing contractor in the Baltimore area! They were quick to come out and assess damage to my roof, offered multiple options, and took the time to discuss which one best met my needs. Their prices are affordable and customer service is outstanding. The roof looks great! I would recommend this company to anyone looking for a new roof."

The company representative says that in addition to shingled roof repair and replacements, the company also does other types of exterior improvements. This includes being very good when it comes to repairing or recovering commercial or residential flat roofs. They use proven and economical torch-down roofing to make a weathertight seal on all different types of flat roofs. He also talked about how they have established a good reputation in Towson and the surrounding Baltimore areas when it comes to doing gutter & downspout repair and replacement work. Many of the area?s homeowners, commercial property owners, and real estate agents also look to capitalize on the company?s many years of roofing experience by having them perform thorough and accurate roof assessments. The company representative says that those who would like more information on the best roofers in Baltimore can contact them by phone, email, or by filling out and sending in the form that?s found on their website.
