

Mindmachines.com Restocks RoshWave pROSHI Neuroodynamic Activator Emulation Device

September 12, 2022

Dallas, Texas - September 12, 2022 -

Mindmachines.com has restocked the popular RoshWave pROSHI Neuroodynamic Activator Emulation Device and is currently accepting orders for immediate shipment. RoshWave is a self-meditation device that delivers the perfect rendition of the entire catalog of classic ROSHI protocols in one, small easy to use device.

"It is so exciting to finally be able to own a ROSHI protocol device. It is even more wonderful that the RoshWave contains all three of the pROSHI models inside," says a mindmachines.com customer.

The RoshWave uses a proprietary algorithmic "Error-Correction System for the Brain" which normalizes brain waves as opposed to standard entrainment. RoshWave does this through the process of "Dynamic Neuro-Activation," through which RoshWave dis-entrains abnormal brainwave frequencies in the brain and quiets the mind. The RoshWave device contains all three original ROSHI disentrainment protocols including pROSHI BB, pROSHI II, pROSHI II+ and pROSHI II+ 3D.

Mindmachines is an online distributor of brain machines, brainwave entrainment technology, AVS stimulation devices, EEG neurofeedback equipment, mind machines and meditation machines. Mindmachines.com is also the worldwide distributor of the RoshiWave self meditation device. For more information about the RoshiWave, visit their website at mindmachines.com. The RoshiWave self meditation machine is currently available at the mindmachines.com website.
