

DC Podiatrist Dr. Ijeoma Nwuju, DPM, Is Offering Microwave-Based Wart Treatment for Plantar Warts

September 29, 2022

September 29, 2022 - PRESSADVANTAGE -

Foot and Ankle Wellness Center, a premier podiatric medicine and surgery practice with locations in Washington, DC, and Clinton, MD, has announced that it is now a certified provider of the Saorsa Swift Microwave Therapy system, a breakthrough procedure for treating plantar warts. Readers in the clinic's service area can find out more by heading over to its website at <https://www.drijeomanwuju.com/>.

The Saorsa Swift Microwave Therapy system has been hailed by podiatrists all over the country as the definitive solution to treating plantar warts cleanly, safely, and with little to no pain for the patient. Medical professionals have praised the microwave-based plantar warts removal treatment as being miles ahead of traditional options such as cryotherapy, laser ablation, salicylic acid, and surgery.

The potential medical use of microwaves has been studied extensively for decades now. Microwaves are a non-ionizing form of radiation which means that they don't affect the DNA of the cells they come in contact with. Instead, they cause the oxygen molecules within the cells to start colliding and creating localized heat energy. This targets the root cause of the issue and makes channeling microwaves a fast, simple, and effective option for treating skin lesions.

The Saorsa Swift Microwave Therapy system produces microwaves inside a unique compact generator which are delivered to the affected tissues on the patient's foot in precise, highly controlled doses. The microwave radiation is so finely tuned that clinicians can be assured that there will be no lateral spread and it won't travel any further into the skin than a depth of 6.5 mm. This predictability means that the Swift Microwave Therapy system causes no damage to the healthy tissue surrounding the lesions, a claim that conventional plantar warts treatments cannot make.

Patients who have benefitted from the Saorsa Swift Microwave Therapy system also report a more relaxed and stress-free experience during the procedure. Saorsa's system produces no smoke, requires no bandages, and requires no anesthetic. Patients can also resume their daily schedule shortly after the procedure as there is no or low post-procedural pain. With the Saorsa Swift Microwave Therapy system, appointment times are also short as medical professionals can administer the treatment within just 5 to 10 minutes.

Foot and Ankle Wellness Center, led by Dr. Ijeoma Nwaju, DPM, is an early adopter of the Saorsa Swift Microwave Therapy system in the United States. The clinic also offers several other podiatric services such as bunions, orthotics, minimally invasive foot surgery, sports injuries, foot pain, heel pain, wound care, medical pedicure, Keryflex, MLS laser therapy, reflexology, and fungal nail therapy. The clinic is urging patients to follow its Facebook page at <https://www.facebook.com/IjeomaNwajuDPM> to keep up with news and announcements about its podiatry services.

When asked to talk about what drives his work at Foot and Ankle Wellness Center, Dr. Ijeoma Nwaju says, "Our mission is to provide our patients and our community with the highest quality medical and surgical care in a safe, comfortable, compassionate, and respectful environment. We strive to exceed all your expectations." The podiatry clinic's local Washington DC and Maryland patients have responded positively to its mission as it has an overall rating of 4.96 out of 5.0 from a total of 117 reviews across its online business profiles.

Ijeoma Nwaju, DPM, graduated from New York College of Podiatric Medicine in 2014 and completed his residency in Foot and Ankle Surgery at Howard University Hospital in Washington, DC. He is an active member of the American Podiatric Medical Association with a special interest in pediatric podiatry care, sports medicine, reconstructive foot and ankle surgery, trauma, and wound care. Dr. Nwaju is licensed to practice podiatric medicine in Maryland and Washington, DC, and is board qualified by the American Board of Podiatric Medicine. He is affiliated with several hospitals in the area, including Howard University Hospital, United Medical Center, Bridgepoint Hospital, and Southern Maryland Surgical Center.

Dr. Nwaju also regularly posts updates about his practice on his Twitter page at https://twitter.com/foot_dc?lang=en.
