

North Shore of Boston Company Becoming Well-Known for Its Safe and Efficient Tree Removal Service

October 11, 2022

October 11, 2022 -

Beverly, MA-based Cicoria Tree Service is a company that is well-versed in all aspects of tree care and maintenance. This includes being able to safely take down even the largest trees that are found on the properties of homes and businesses in the North Shore of Boston & Essex County. The company owner, Mark Cicoria, says, ?There are many reasons why North Shore home and business property owners may need to remove a tree from their landscape. This includes when dead and dying trees pose a threat from potentially falling on structures and when trees grow so large that they start to encroach upon homes and buildings. It may even be a case where a tree?s root structure expands to the point where it begins to damage a driveway, sidewalk, or even a foundation. No matter what the case that requires the necessity for tree removal on your property, the professional crews here at Cicoria Tree and Crane Service can bring those trees down safely.?

The owner also cautioned against home and business owners trying to take down trees themselves. This is because tree removal takes special knowledge and equipment to be safely undertaken. The same type of knowledge and equipment that the professional crews at Cicoria Tree Service possess. This includes the

company having cranes available to help safely take down taller trees and other forms of special cables and rigging to make sure a tree falls exactly where intended. Cicoria says, ?Make no mistake about it, tree removal is a job that can pose an extreme danger to people and property if not properly done. That?s why I always highly recommend that tree removal only be undertaken by professional tree care companies such as hours. Not to mention that the prices we charge for tree removal are much more reasonable than most people expect.? He also wanted to mention that to reclaim the ground area where a tree once stood, his company is very proficient when it comes to stump removal. A process that he mentioned can be done in one of two ways. The first and least expensive method is to grind away a stump. This is best done when only the surface area where a tree once stood will be used for planting grass or other purposes where the area will not be dug up. In the case where structures such as swimming pools and home editions are being built, the company owner stated that complete stump removal by excavation is the best way to go.

Cicoria is also very pleased about how their customers often leave a 5-star review for tree services such as tree removal. This includes a glowing review from Marc Johnson who proclaimed, ?Cicoria did a fantastic job removing a very large dead maple tree that was close to our house. They communicated the schedule very well, arrived like supermen flying in on the crane, securely chained the tree in segments, and then cut and removed the tree in a little over an hour. Later in the day, we went over to inspect where the crane and cutting operation had been staged and we couldn't even find any sawdust indicating where the tree was cut up. Phenomenal job - Thank you!? Kurt Frampton stated, ?The Cicoria Team removed a 100' White Pine that I was concerned would fall onto my home. The crew and crane were professional and amazing. No sign of them even being there, except for the missing hazard. Thanks!?

Cicoria also stated that they are family owned and operated business that takes much pride in living and working in the community which they live. That?s why their customers have gotten nothing but the best full-service tree care since the company started in 1981. He says their certified arborist-led crews are TCIA-Accredited and they are also a company that is fully licensed and insured. For more information on the professional tree services that the company offers such as tree removal and stump grinding, the company owner welcomes people to get in touch with him by phone, email, or website contact form.
