

Christmas Lights Installation Company In Houston Announces Mega Deals

November 17, 2015

November 17, 2015 - PRESSADVANTAGE -

Christmaslightspros.xyz is the leader in holiday lighting installation in the Houston metro area and has launched a Mega Deals offer just in time for the holiday. This is the season of joy and happiness and unfortunately also one of the most stressful times of the year due to family and all the responsibilities and accommodations through the season. Christmaslightspros.xyz is home based in Houston but now also services the surrounding areas including Katy, Fulshear, Pecan Grove and Cinco Ranch.

"It's an exciting time for us as we expand," says managing partner Chris Meng. "Our goal has been to provide quality services from the very beginning and now with our new Mega Deals option folks can enjoy the done-for-you Christmas lights without the price tag. In the beginning we only serviced a small area, but as we began to make homes look amazing people started taking and we had to expand. Our Mega Deals offer includes up to 20% cost savings and a membership model to save even more."

Christmaslightspros.xyz new membership model is something that has not been done before and it offers the home owners the option to pay a monthly fee so they do not need to pay a large sum at the end of the year. Besides residential services Christmaslightspros.xyz also has options for commercial holiday lighting so that

local business owners can enjoy the benefit of attracting new customers this season.

Our commercial services include not only the installation and removal of Christmas lights, says Meng, it also includes the storage and even the option to have the lights provided for you. In addition we have a variety of lights from LED to standard incandescent to even festive colored lights and rope lights to choose from. We even provide maintenance too. We wanted to make it easy for people so that's why we invested in our own lights so all you have to do is enjoy them.

Christmas Lights pros are leading the way in lighting and plan on continuous growth throughout the season.
