

Chicago Website Design SEO Company Publishes Bluehost Review by Jack Lombardi

October 07, 2022

Chicago, Illinois - October 07, 2022 - PRESSADVANTAGE -

Chicago Website Design SEO Company (CWDSC), a digital marketing agency, has recently published a review of Bluehost web hosting by Jack Lombardi, founder and CEO of CWDSC. Bluehost is among the largest web hosts in 2020 throughout the world and it is even officially recommended by WordPress. The review examines mostly the data and the experience that people can expect from the hosting company and its customer support.

Jack Lombardi, founder and CEO of CWDSC, says, "Hosting companies have one main aim and that is to provide website hosting services, however, they come with unique features that set them apart from their competitors and Bluehost is not an exception. These features can make the process of choosing the best hosting company for your business a difficult one. You need to find a company that has features that meet your needs and give you consistency. In the review, I went through some of the features provided by Bluehost and how they can impact your website. Overall, I was impressed by the 99.99 percent uptime of Bluehost."

With regards to website load speed, Bluehost also does not disappoint because its 398ms load speed makes

it one of the top 10 fastest websites they have ever tested. Loading speed is vital because Google has observed that most mobile websites have below average load speeds. Slow loading speed can severely affect the business as most users will get disappointed and will likely go to a competitor's website, never to return again. And Google also doesn't like slow sites.

Of course, pricing is one of the major factors that people consider when choosing a web hosting provider. Fortunately, Bluehost has also made sure that they offer reasonably priced services, considering all the features that they provide. For instance, they have a plan that is available for as low as \$3.95 per month, which represents a good deal that was reduced from the regular \$7.99 per month. This package that provides a single website comes with unmetered bandwidth, 50 GB storage, free SSL certificate, and much more.

In terms of security, Bluehost also doesn't disappoint. It provides some of the best security alternatives available and it even includes a free SSL certificate for all plans. Any plan will also be provided with domain privacy, which would be very helpful when the user wants to sign up for a private domain and ensure the information is personal because this prevents hackers from gaining access to personal information. SiteLock will also be provided which protects the site from malware that often attack WordPress sites. Other security tools provided are CodeGuard, Postini by Google, and more.

Bluehost also offers helpful integration features. Thus, it is possible to install content management systems such as Joomla, WordPress, Drupal, e-commerce shops, and many more by just following simple steps. They also offer Content Delivery Network access for those who want to have large files and images.

Bluehost is also easy to use for beginners. It has a control panel that is easy to understand and will simply require some points and clicks. They also offer a money-back guarantee in 30 days. And finally, they provide everything that users need in terms of customer support, including an informational knowledge base, phone support, email ticket support, and active live chat.

Launched in 2008 by Jack Lombardi, CWDSC has grown into a top search engine optimization company that serves the Chicago area and other major cities in the country. While it is based in Chicago, it has several locations in seven other key cities and provides their services to 76 towns. The company has a team of four reliable full-time professionals, each one a specialist in the type of service they provide and have a total combined work experience of more than 25 years.

People who would like to get more details about the Bluehost review by Jack Lombardi can check out the Chicago Website Design SEO Company website or contact them on the telephone or through email.
