Keyroo, the Dallas-based real estate solutions company, announced its innovative "KeyMax Hybrid" system to homeowners looking to sell their homes. The intelligent system offers homeowners a way to get the most money without ever needing the services of a traditional agent.

Dallas, TX - Keyroo unveiled its innovative KeyMax Hybrid system for homeowners looking to sell their properties without employing the traditional MLS listing, real estate agents, or wholesalers. "It is the best and fastest way to 'Sell My House Fast Dallas'", said one homeowner who learnt about the system. The new system is set to revolutionize selling homes by giving power back into the hands of homeowners.

Keyroo's KeyMax Hybrid offers the following three services in a single system to maximize what homeowners can get while minimizing unnecessary sale delays and overhead.

Provides dedicated connection to Home Advisor:

The KeyMax system puts experts at a homeowner's disposal regardless of whether the homeowner is ready to sell or just researching the market options. They listen to their client's demands and circumstances and provide advice and assistance based on individual cases.

Provides competitive cash offers from vetted real estate investors:

The KeyMax Hybrid system is ideal for homeowners searching for options to sell their homes immediately without compromising on the value of their property. By adding such properties to the KeyMax program, the Keyroo team is able to directly connect property owners with vetted and qualified real estate investors looking to invest in comparable properties.

Provides resources to close sales with confidence:

Homeowners can be confident that every offer they receive is genuine and that the investors working with Keyroo have the resources necessary to close the deal quickly on previously agreed-upon terms. The Keyroo team deducts their service charges from investors when the best cash offer sale is successfully completed. Homeowners get to finalize the home's sale with no fees, no closing costs, and fast processing.
