

North Texas Plumbing Provides Certified Medical Gas Plumbers in the Dallas Fort Worth Area

October 07, 2022

WATAUGA, TX - October 07, 2022 -

North Texas Plumbing, a commercial plumbing company based in Watauga, TX, is providing the services of certified medical gas plumbing experts who work with medical gas pipe installations in the Dallas Fort Worth Are that includes Fort Worth, Dallas, the DFW metroplex, and North Texas. These are specialist commercial plumbers who have the knowledge, skills, and experience in the installation of medical gas plumbing for hospitals, health care facilities, medical offices, veterinary offices, emergency rooms, operating rooms, hybrid operating rooms, and veterinary surgical centers. They can provide various kinds of medical gas plumbing services, such as: nitrous oxide piping, oxygen piping, oxygen pipe welding, medical vacuum installation, medical air compressor installation, medical gas manifold installation, take-offs and engineering systems, medical gas outlets, zone valve installation, and medical gas plumbing alarms.

Marc Sims, owner of North Texas Plumbing, says, ?Medical gas installers are specialist plumbers trained and certified in installing medical gas pipe systems. Our medical gas installers are specifically certified by the State of Texas as installers for medical gas. Only licensed medical gas installation plumbers should install medical gas pipeline systems. North Texas Plumbing specializes in medical gas pipe installation for new construction as well as renovations and repairs.?

The medical gas plumbers from North Texas Plumbing have the capability to install or repair the plumbing system for medical gas; the piped vacuum systems; the supporting parts such as manifolds, outlets, and zone valves; and the alarms. All of their medical gas plumbers are certified ASSE 6010 installers. These are medical gas plumbers who have the requisite knowledge and experience in the various kinds of oxygen storage, such as chemical compounds, cryogenics, and high-pressure oxygen tanks. All of these are important because the medical gas plumbing systems in Texas are required by law to be certified by the State Board of Plumbing Examiners. North Texas Plumbing has master plumbers who have received a Medical Gas Piping Installation Endorsement, which gives them the authority to install piping that are intended for delivering gases for medical applications.

The expert medical gas plumbers from North Texas Plumbing will make sure that all of the medical gas piping installation or repair that they will be providing are always based or in compliance with the NFPA 99 standards for positive pressure medical gas plumbing. It is important to observe that these medical pipes are to be used for delivering various types of medical grade gases from a utility room where the gases are frequently stored in tanks and then delivered through gas pipes to different parts in a health care facility. The fire safety standard requires the assurance of various levels of protection based on the risks and hazards to the staff, visitors, and patients, to reduce the risks of explosions, fires, and electrical accidents. All of their medical gas plumbers have been ascertained to be certified by the State of Texas as installers for medical gas. This is essential because only licensed medical gas installation plumbers are allowed to work on medical gas pipeline systems.

Founded in 2013, North Texas Plumbing offers commercial plumbing services for various kinds of businesses in the North Texas area, such as the Dallas-Fort Worth Metropolitan Area. They offer different kinds of plumbing services such as: drain line repiping; water jet pipe cleaning; grease trap installation; foundation leaks and slab leak repair; water line rerouting; medical gas plumbing; sewer line repair and replacement; tankless water heater installation; water main repair and replacement; drain cleaning; gas line repair; gas line installation; and more. The medical gas piping installation that they can provide has to do with: nitrous oxide piping; oxygen pipe welding; oxygen piping; medical air compressor installation; medical vacuum installation; medical gas manifold installation; take-offs and engineering; medical gas outlets; and alarm, zone valve installation.
