Proactive Healthcare Recruiters is pleased to share that one of Slidell's best outpatient clinics ? that focuses on orthopedics, sports medicine, physical and rehabilitation medicine, neurology, and geriatric patients ? is looking to fill out their staff of Physical Therapists. For more than 20 years, this busy outpatient clinic has been making a difference in the community. With multiple treatment programs, there is always room for growth and the opportunity to hone a professional's skills. The clinic offers a variety of services, though they are well-known for Aquatic Therapy, Dry Needling and Sports Medicine. The clinic has its very own indoor pool, which gives them the unique advantage of being able to offer low-impact Aquatic Therapy onsite, which is not found anywhere else in the region. Aquatic Therapy can help patients with various conditions, such as arthritis, chronic pain, fibromyalgia, injuries and post surgical therapies. Aquatic Therapy is performed in a warm-water pool by a licensed physical therapist who has completed Aquatic Therapy training. Working with individual patients, they develop a personalized treatment program to help patients achieve their rehabilitation goals.

Dry Needling is a skilled intervention therapy that uses fine needles to penetrate the skin and stimulate underlying muscular and connective tissues and myofascial trigger points to manage pain and movement impairments. This therapy releases or relaxes contracted muscles, improves range of motion and increases blood flow and circulation.

The clinic's Sports Medicine team is widely respected, working with athletes from all levels across various sports to prevent, diagnose and treat injuries. The team uses the latest evidence-based treatments and therapies to help their patients get back to their sport as quickly and safely as possible. The professional staff also has exclusive access to MED X equipment. The clinic also boasts a full-service athletic club in their premises. Additionally, the Slidell clinic offers ASTYM Therapy, treatment for vertigo and balance disorders, management of Parkinson's Disease, spinal traction and more.
