Emergency Water Damage Contractors in Phoenix Earn Another Five Star Review

October 27, 2022

Mesa, Arizona - October 27, 2022 -
Mesa, Arizona - Dry Star Restoration, a company based in Mesa, AZ, that offers emergency water damage contractors in Phoenix, is proud to announce that they have received another five star review from a satisfied customer. The task involved drying the house because of flooding from a leak from a clean water source. Their team of water extraction experts are always prepared at any time of the day and any day of the week to offer their services whenever a disaster strikes. They can respond very fast to mitigate the damage caused by water on the property. They will not only provide a remedy for the original issue but they will also make sure that every affected portion of the home will be professionally cleaned, deodorized, and sanitized.

In the above-mentioned five-star review, Tyler R. said, ?Dry Star came out to my house quickly and started work immediately. I had a leak from what the tech told me was a ?clean water source? and I called right away and they were able to get my house dried out by taking off baseboards and putting hoses into the wall and told me that most companies would just tear out my drywall. I had a great experience with this company and would recommend them to all of my friends and family.?

Richard Appel, owner of Dry Star Restoration, says, ?It may seem that getting a five-star rating after receiving

a lot of them is no longer a big deal but it still is. This is because we believe that providing the best service is our never ending goal. And getting feedback from our customers, allows us to know where we stand in achieving our goal. We are grateful to our customers for taking the time to give us some feedback, whether positive or negative. Our customers can rest assured that we are always focused on offering our best service.?

Water damage may happen due to a variety of reasons. Heavy rains can cause rivers to overflow and cause flooding, toilets can break down, or pipes in the home can burst. Water damage due to sewage backup can be worst because of the dirty water that can pose a health risk for the members of the family.

When called, the professional water damage contractors from Dry Star will evaluate the source of the water before making a decision as to the proper action to take. In most cases, working as fast as possible is necessary because the longer the infrastructure, fabrics, and precious belongings are soaked in water, especially when the water is dirty, may cause those items to become damaged beyond repair.

There is also the possibility of the growth of mold and mildew. Mold and mildew like damp places, which is why they are likely to grow fast in water soaked parts of the home or property. This is why it is important to perform water damage mitigation as fast as possible. The water damage experts from Dry Star Restoration will begin working on drying affected areas as quickly as possible to minimize the risk of mold and mildew growing quickly inside the home.

Established in 2012, Dry Star Restoration has grown into a top provider of water and fire damage restoration in Arizona. They are a family-owned full service water damage restoration company providing the best possible service in restoring the home or business to its previous state before the catastrophic event. Their certified professionals have established a reputation of being very responsive and having the relevant knowledge and experience on mitigation that is vital in minimizing the disruption caused by a disaster, like a flooding or a fire. Their service area includes: Chandler, Apache Junction, Fountain Hills, Higley, Glendale, Gilbert, Mesa, Gold Canyon, Paradise Valley, Rio Verde, Phoenix, Peoria, San Tan Valley, Queen Creek, Scottsdale, Tempe, and Tortilla Flat.

Those who need emergency water damage and emergency fire damage contractors in Phoenix can visit the Dry Star Restoration website or contact them through the phone or by email. They are open 24 hours a day, at any day of the week.
