

US Natural Health Firm Aids American Men in Fighting Vicious Low T and Obesity Cycle

November 18, 2015

November 18, 2015 - PRESSADVANTAGE -

With studies revealing the link between low testosterone levels and obesity, some American males are trapped within a vicious cycle of serious health conditions and as the numbers continue to rise, a US natural health firm steps in and offers a top-rated testosterone booster to help address the problem.

Published studies have long identified obesity to reduce testosterone levels in men, but new findings are reversing the long-standing relationship. A study published in the Journal of Clinical Oncology showed that 50% of male respondents undergoing long-term androgen deprivation therapy developed the metabolic syndrome, manifested by increased abdominal obesity and elevated blood sugar.

A Growing Concern

Obesity is considered a disease that is constantly increasing in prevalence throughout the globe. In the United States, an estimated 70% of male adults are either overweight or obese raising the red flag of health authorities. With these statistics, it is only safe to assume that low testosterone and related health problems are nowhere far from the grid.

Adding to the modern lifestyle and sedentary routines of a big portion of the male populace, the problem could aggravate if no intervention is made, which prompted Bri Nutrition to offer a solution on the table.

Top Testosterone Booster to Answer the Problem

Bri Nutrition, a California-based natural health supplement firm wants to help Americans get out of the problematic health cycle between obesity and low testosterone levels by introducing its Top- Rated BRI Nutrition Testosterone Booster to the market. It is an all-natural supplement containing diindolymethane, Tongkat Ali, Tribulus Terrestris, Magnesium Sulfate Anhydrous, Boron and Zinc?ingredients that may significantly help in increasing testosterone levels among men.

Candice Nellie Styles, Marketing Communication Manager says, "We want to give adults and aging men an option to increase their testosterone levels to help them stay in shape and feel good about their body, and at the same time reap the different health benefits accompanied by it."

"The good thing about Bri Nutrition Testosterone Booster is the fact that through increasing the levels of testosterone in the body, it catalyzes into other health advantages including fat loss, increased sex drive, improved cognitive ability and enhances mood. It may also help you avoid other serious health problems related to weight gain like diabetes and cardiovascular diseases," Styles added.

BRI Nutrition Testosterone Booster has no artificial fillers, and is also great for workout power, recovery, vitality and overall health & life-wellness.
